### Artist Statement

I work primarily in both photography and abstract digital art. The photos I capture provide a palate for manipulation as if painting on a canvas. My work is more a painterly endeavor than pure photography. I utilize depth, angle and light during the initial shots in order to maintain an abstract vision with less manipulation. The final images are created by putting the photos into motion, freezing frames, symmetrical imaging and glitch processes. In addition, I work in portraiture, still life, street and landscape photography.

### Recent Exhibitions
