

ENVIRONMENTAL TESTING – *Mold, Asbestos, Lead*

Pro View's Mold, Asbestos and/or Air Quality testing can help with identifying the source of odors and contaminants that may cause short or long-term health ailments and/or elevated risk to the building's structural components. We are trained to conduct the tests with the industries best testing equipment and methods. The samples are analyzed and lab certified. A report is provided to you that highlights any areas of concern and/or recommended remediation.

We offer this as a standalone service, or it can be added to a home inspection for a discounted rate. Please contact us for more information.
