Dear Patrons,

Greetings.

Indeed it is a great occasion to celebrate. Professionals from various backgrounds and skill-sets getting together under the umbrella of Koushal Vikas foundation, to share their expertise to the young and needy of the nation. also joining hands with the founders of the foundation to contribute to the journal. Sincere thanks to all the contributors.

It is also a memorable occasion to bring out the first edition of this journal and dedicate it to the respectful memory of the father of our nation, who in fact, even in those days emphasised the need for improving the skillsets of our people,

It is in this context, we are appealing to all like minded professionals to perceive the urgent need to identify the shortage of skillsets in each of the domains and design necessary supplementing initiatives to fill the gap. KVF has already planned a series of initiatives in this regard and has sought the help of many qualified technical experts to support our initiatives.

KVF sincerely acknowledges the support of those experts behind our initiatives and expresses grateful thanks and hopes that this affiliation would continue for long time to come.

With Regards

Chief Editor
