I want to send a shout out to the fantastic Piano Doctor who provided excellent service on our vintage 1912 baby grand piano.

Sounding like a haunted treasure from the Adams Family live-in museum, our new-to-our-home piano was in desperate need of a tuning after we moved it half way across Tucson.

Whilst driving around our local area, my Amazing Husband had noticed, on various occasions, a vehicle decorated with piano keys along the side, with the words, "Piano Doctor," proudly printed on it. So we Googled, and walla!

This lovely gentleman's name is Jens, he is from Germany with the most wonderful accent, and he is a veritable encyclopedia of knowledge when it comes to pianos - he even wrote his own book - it's like a foot thick!!

He charges \$175 for tuning per piano. He is methodical, and worth every penny! (And I love how he uses carbon paper to get a copy of his documentation, so wonderfully old school.

He is the Piano Doctor here in Vail. His office number is 520-722-2882. His wife's name is Trudy, who you will most likely speak with to set up an appointment. Tell him Clint and Lis with the big Saguaro Cactus in their back yard, and Baby Grand Piano referred you hehe, he'll know who you're talking about (he LOVES cactus!  $\Psi$ ).

And what of our lovely piano? It sounds simply pristine. We couldn't be happier.

# Hello Jens!

I apologize for not contacting you sooner - with the move from Arizona to Texas and then immediately starting my new position I have been very busy. First, I want to let you know that my baby (the 1934 Harrington) made the trip flawlessly. I instructed the movers that this piano is more than an instrument or piece of furniture, and that they were to treat it as if they were moving their elder relative! Secondly, my family was "blown away" by the detail and perfection of the restoration you performed. As I mentioned, my father (born in 1942 - 8 years after my Grandmother received this piano from her father) would be impressed. "Impressed" was an understatement as I believe I saw a tear in my father's eye when he first saw and heard it. I have an Aunt and an Uncle who both played this piano from childhood and cannot wait for them to visit Texas (they both still live in New York where the piano was born.) Even so, I believe I am the one who has the greatest appreciation for your work. I first played this piano in my grandmother's home in 1965, and as a child I fondly remember listening to my Aunt, my Uncle, and my Grandparent's friends playing this piano. My childhood now comes back to me every time I sit down with the piano. You have restored my piano to it's original sound - so perfectly that it spawns my childhood memories! I don't want to let it go unmentioned that the physical restoration is beautiful and that no attention to detail was spared, but the true beauty is that you have somehow restored the soul of my piano and that is what resonates with me.

I will send you a picture once we have finished the room where the piano is (the previous owners of this house had a horrible sense of interior decor). If you ever find yourself in the Dallas area please call - we'd love to see you. Also, my previous offer still stands - if you want to give her the first tune I'll pay for your plane ticket!

Please pass our best to Trudy and the children. I hope you all have a great year at Tanque Verde Elementary!

Best regards, K.C. Kenney

Dr. Jens fixed a prince's piano in Germany many years ago. I can see why. His work is amazing! (This isn't the exact piano)

their show pieces. They restored this piano that was found in a chicken coop.

This is another beautiful piano in a happy customer's home.
