Dear Professor Witter,

With this letter, I would like to say thank you so much for being such a big help to me!

During the search for my “dream piano”, I owned several instruments with more or less technical problems.

You always have been the one to listen to my difficulties and to help, mostly by doing the “diagnosis” over the phone. Your advice was always extremely competent and you showed patience and an open mind. It is more than impressive, that you always have an answer to all kinds of questions and a solution for almost everything.

That shows, that “big problems” are caused very often by “little things”. In those cases you have to know the “How” to solve them. You are the expert for that.

I’m hoping, that our – for me very profitable – relationship will last as long as possible.

Sincerely yours

Martin Wiemer
