

Capability Statement

Primary Power Consulting Limited is a privately-owned power engineering and utilities consultancy in the UK. We have a proud heritage, notably in the quality of our workforce, self-delivery ethos and strong design and technical capacity.

Headquartered in the Northeast of England, our values of reliability, professionalism and dedication are at the heart of everything we do.

With over 300 years combined experience in delivering HV & EHV power distribution, transmission and generation projects to the utility, rail and oil & gas sectors, Primary Power Consulting are ideally placed to support asset owners and contractors to design & deliver complex schemes from conceptual phase through to commissioning and entry to service of substations, underground cable systems and overhead line networks.

The business has grown rapidly since our formation, and we invest significantly to develop our resources, systems and infrastructure to facilitate continued expansion of the company.

We are passionate about the way we work, providing a reactive service delivering the highest level of performance. Working with all our customers, offering carefully valued engineered and practical solutions.

Primary Power Consulting Limited fully supports the ethos of continual improvement through all areas of the business. Operations are managed by adhering to the processes and procedures set out within our accredited Health & Safety, Quality and Environmental (HSQE) management system to ISO 9001 and 14001. This ensures that quality is achieved, best practice is adopted, a safe workplace is maintained and any impact on the environment is kept to a minimum.

Our performance is constantly monitored, and results are collated and reviewed at regular intervals. These results are used as an aid to continuously improve our performance and produce the highest standard of construction quality and workmanship to benefit the end user.

Primary Power Consulting are experienced in undertaking roles and responsibility under the CDM Regulations, where we have robust processes for compliance and co-ordination of supply chain partners and other contractors.

The team has worked extensively throughout the UK and Overseas servicing the following sectors

- Transmission Network Operators up to and including 400kV
- Distribution Network Operators up to and including 132kV
- Private Network Operators up to and including 33kV
- Oil & Gas Processing
- Power Generation including Heavy & Light Fuel Oil, Nuclear & Renewables
- Mass Transit and Metro Power System including 25kV overhead and 650V DC traction power

We believe that the key to designing and delivering any project successfully, regardless of its size or nature, is the ability to listen and to understand the client's needs and nuances.
