management

We provide a personalised service & real expertise to ensure you effectively manage your legal spend.

Legal Invoice (bill) Review and Spend Analytics

Unlike other services on the market, we provide a unique human-led service that is supervised by qualified lawyers. We review each invoice (bill) by line item, to ensure your law firms are adhering to your billing guidelines and agreed rate cards, enabling us to capture savings that could be missed by automated systems generating unheard-of cost savings!

COOTE O'GRADY
WE ARE LEGAL SPEND MANAGEMENT

Our Legal Invoice (Bill) Review service delivers on average 7% more savings than our competitors while providing ongoing savings of between 2% and 6% on your external legal spend.

We continuously save our clients' money, while allowing in-house lawyers to focus on high-value tasks. Our in-house legal spend management experts ensure our Legal Invoice Review service provides immediate impact. It's quick and easy to implement (within 24 hours in some instances), with no licensing fees or change management programmes to consider.

Our unique approach means we can design you a service that's bespoke to your team's needs. We have already supported numerous clients move from their automated system provider to our flexible approach. As our service doesn't need to be linked with other internal IT systems, it means you save time and money on expensive integrations. Our solution is also built to deal with local and changing tax issues (e.g. VAT etc.)

Our flexible approach to our clients' needs means we often manage negotiations over problematic invoices (bills) with the law firms on behalf of our clients, enabling us to build strong relationships with both our client's and the law firms to deliver the best results for all parties.

Our unique Insights & Analytics Dashboard provides real-time data allowing you to monitor and drill-down into your total legal spend and see where total savings have been made. Keeping track of savings made enables you to see the long-term sustainable benefits our service is providing. Our process has consistently and rapidly delivered significantly more spend and savings through the invoice review programme than automated systems due to its human, flexible nature.
