

Africa for sustainable development Fellowship

Introduction
COHORT 3 Profiles

Hiwot Ergetie Temechew

Sustainable Infrastructure

As a Researcher and Engineer, Hiwot is passionate about sustainable infrastructure and its potential to drive positive change in Africa. Her interdisciplinary knowledge, research background, and commitment to education empower her to bridge the educational gap and address grassroots challenges. Through cross-boundary collaboration and a focus on environmental justice, she aims to transform the construction industry and empower women in science. With a track record of success and a strong belief in the power of sustainable development, she strives to inspire the next generation of African leaders to create a resilient and eco-friendly future.
