CARE AND MAINTENANCE

Curing Time

While your autobahn™ window film cures you may see slight hazing and distortion as mounting solution dries out completely. Warm weather and direct sun light exposure shorten the curing time. Conversely, cold or non-sunny conditions can lengthen the curing time. Please do not roll down or wash windows for five (5) days during curing time.

Care and Maintenance

Autobahn™ window films are designed to be durable under normal cleaning. To maximize the life of window film, please follow these cleaning instructions:

1. Avoid abrasive cleaners or tools
2. Do not apply sticker, labels, or suction cups to the film surface
3. Use fresh, clean materials to wash and to dry. For example, avoid using sponges used to clean the outside of your vehicle
4. Use traditional glass cleaners or dilute dish soap in clean water
5. Avoid some paper towels which are coarse enough to cause fine scratches that may accumulate over time
