

Jared,

We want to take this opportunity to let you know how fortunate we feel to have worked with you on the construction of our home. The house has exceeded our expectations! We can't say enough regarding the partnership you created with us. Since we know we have high expectations, we knew building a home would be stressful. Your calm demeanor made the process easy. And, the house was done on time and on budget!!

Your innate confidence exudes a level of expertise and knowledge that inspires trust. One of the things we appreciated most was your ability to answer our questions. In addition, your thorough research of the products we chose and/or asked about was extremely helpful.

During construction we met several of the subcontractors. Each of them made a point of telling us we had made an excellent choice in using Copper Hills Construction. The house was built with care and precision - down to the lettering on the mailbox!! We believe the great relationships transfer over to the finished product.

Our neighbors also commented on the clean and tidy workplace. You were extremely considerate of the affect building process would have on them.

It has been a pleasure to work with you — you are the consummate professional. Please feel free to show our home or have prospective clients call us.

Sincerely,

Gary and Pam Farber
