

Getting Started with Your Hypex nc252 Amplifier (assembled by Deer Creek Audio)

Please take a moment to review the following details on your new Hypex nc252 amplifier, assembled by Deer Creek Audio.

What's Included

- Assembled amplifier
- Printed test results
- Power cord
- Allen wrench for front cover

Break-in period

When you first turn on the amplifier, allow approximately 60 minutes warm-up time before critical listening. After the amplifier has broken in for several hours, the starting warm-up time should be approximately 10 minutes.

Amplifier gain settings

Amplifier gain is set at 25.5 DB.

Installation

Be sure to install your Hypex Class D amplifier with adequate ventilation. You'll need at least one inch on top and sides of the unit, preferably with an open front and rear.
