

Initial Settings for Your EQ901 B Plus

Your EQ901B Plus includes two equalization curves on outputs 1-2 and 3-4, respectively.

The Normal mode on outputs 1-2 most closely resembles the OEM equalizer curves. If you wish to make adjustments, you can use the tone controls on your receiver or amplifier.

The Reduced Bass mode found on outputs 3-4 was designed for users with small rooms or those simply wishing for reduced bass response.

If you need to adjust input voltage levels or add a subwoofer, please refer to the User Guide for more detail.
