

Initial Settings for Your EQ901 Platinum

Input Analog, Tone Mode 1, Master Volume -30 dB

Your EQ901 Platinum is being delivered with the following settings that you can vary with the remote control.

- Input: Analog
- Tone Mode: 1 (dual full-range stereo)
- Master Volume: Initial setting -30 dB (0 dB is max)

Level Setting

Your EQ901 Platinum is being delivered with an initial level (gain) setting of -30 dB (max is 0 dB, no insertion loss), which you will adjust with the front panel knob or supplied remote control. It has been set with the analog inputs selected, so be sure to turn down your music source to protect your system at turn on. Be very careful when connecting and selecting Bluetooth, USB and TOSLINK inputs, as these may be at the maximum line level. Once you have your inputs connected and all components on, you can adjust all the gain levels for optimal volume midposition control performance.
