

Greg Davis presented at the SNAME/IBEX Small Craft Technology Symposium on September 30, 2019 "Guidelines for Recreational Boat Stability", the work product of the SNAME MF10 Small Boat Forensics panel, which he chairs.

This guideline is intended to be developed into a SNAME T&R Bulletin. The casualties (capsize) of the Kandi Won and the Khalessi in 2012 and 2016 respectively, are highlighted within this presentation.

The guidelines are intended to inform the boatbuilder of basic stability considerations and current methodologies used to determine stability (via Calculation or Proof Test).

The presentation and the "Guidelines" paper are copyrighted by SNAME and are available through SNAME: [www.sname.org](http://www.sname.org)
