

## Did you know the City of Wasilla is updating their Comprehensive Plan that guides long-term growth and development?

**The comprehensive plan is more than a vision** - its the tool that the City uses to turn community priorities into real, on the ground projects.

**Sets Priorities:** The plan identifies what matters most to the community - whether that is safer roads, parks, improved infrastructure, or new economic opportunities. This helps the City decide which projects come first.

**Guide Smart Budgeting** - When a project is supported by the plan, it becomes easier for the City to include it in annual budgets and to obtain project funding.

**Economic Growth:** The plan guides the City's investments in projects and policies that support investment and the long term community goals.

### Why is this plan important?

- Guides long-term infrastructure upgrades
- Strengthens economic resilience
- Supports responsible growth of Wasilla
- Helps secure funding
