

## MaDD Training Academy – Level One

Name: \_\_\_\_\_

|                                                                                        |                                                                                                                                                                                                                                     |
|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1: I know the names of all six pieces that somebody else shows me <b>BLUE 0001</b>     | 2: I can set up the board to the starting position <b>BLUE 0002</b> <ul style="list-style-type: none"><li>• White pieces on first two ranks</li><li>• Kings are opposite each other</li><li>• White queen on white square</li></ul> |
| 3: I can name the co-ordinates of five different squares on the board <b>BLUE 0003</b> | 4: I understand these chessboard terms: <ul style="list-style-type: none"><li>• Ranks</li><li>• Files</li><li>• Diagonals</li></ul> <b>BLUE 0004</b>                                                                                |
| 5: I know how the king moves <b>RED 0001</b>                                           | 6: I know how the queen moves <b>RED 0002</b>                                                                                                                                                                                       |
| 7: I know how the rook moves <b>RED 0003</b>                                           | 8: I know how the bishop moves <b>RED 0004</b>                                                                                                                                                                                      |
| 9: I know how the knight moves <b>RED 0005</b>                                         | 10: I know how the pawn moves <b>RED 0006</b>                                                                                                                                                                                       |

|                                                                                                                                                       |                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <p>11: I can match a three-dimensional chess piece to its two-dimensional equivalent<br/><b>BLUE 0005</b></p>                                         | <p>12: I can explain what "check" and "checkmate" means <b>BLUE 0006</b></p> <p>Check =</p> <p>Checkmate =</p>        |
| <p>13: I can show how to put the king in check safely<br/><b>RED 0007</b></p>                                                                         | <p>14: I know the three ways to get out of check<br/><b>RED 0008</b></p>                                              |
| <p>15: I can spot which squares are safe or dangerous for my pieces to move to and capture on<br/><b>RED 0009</b></p>                                 | <p>16: I can show how to capture an enemy piece safely<br/><b>RED 0010</b></p>                                        |
| <p>17: Openings: I can demonstrate a good first move for White and Black, and demonstrate a bad opening move for White and Black <b>BLUE 0007</b></p> | <p>18: I can identify whether my king is in check or checkmate in six positions<br/><b>RED 0011</b></p>               |
| <p>19: I can explain what stalemate means, and identify if a position is checkmate or stalemate<br/><b>RED 0012</b></p> <p>Stalemate =</p>            | <p>20: Endgame: I can demonstrate how to checkmate with two queens and a king versus a lone king <b>BLUE 0008</b></p> |
