

Meltham and Denby Dale Training Pack 600-1000

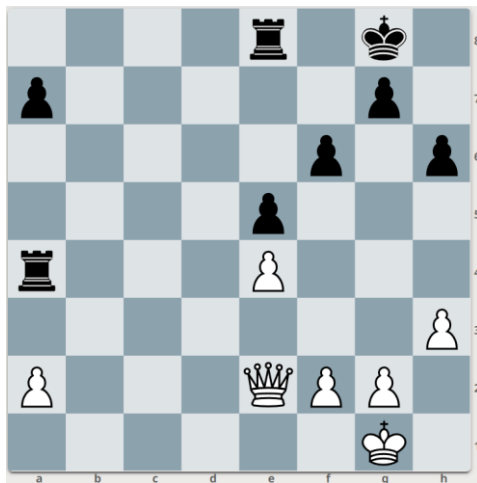

Week 1: Forks with the queen

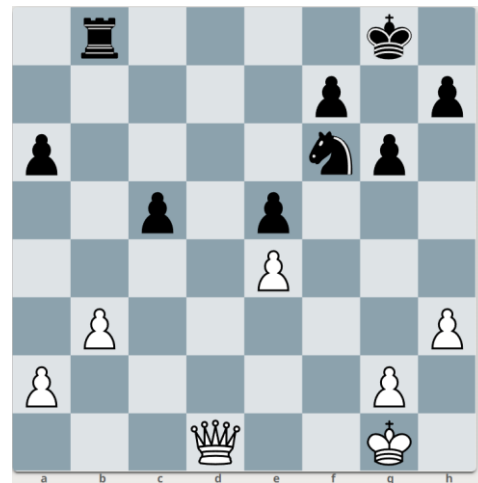

All six pieces can fork enemy pieces, but because the queen can move long distances and several directions on a chessboard, she can often surprise the enemy.

In this position it's White to move. We can fork the Black bishop and knight by playing 1.Qc7

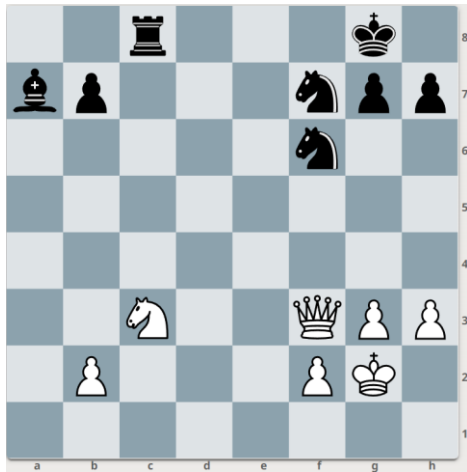

1 – White to move. Find the fork

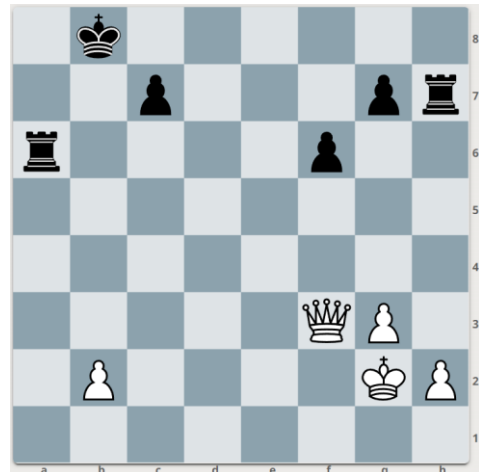

2 – White to move. Find the fork

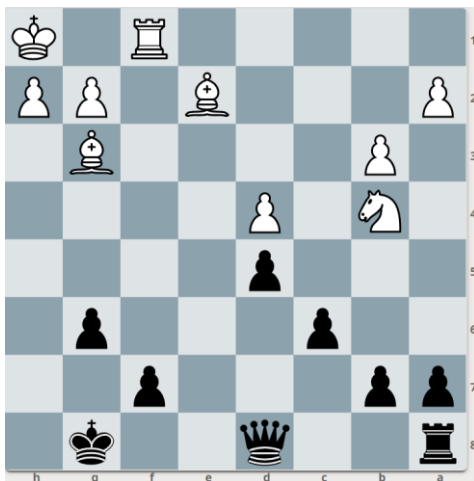

3 – White to move. Find the fork

4 – White to move. Find the fork

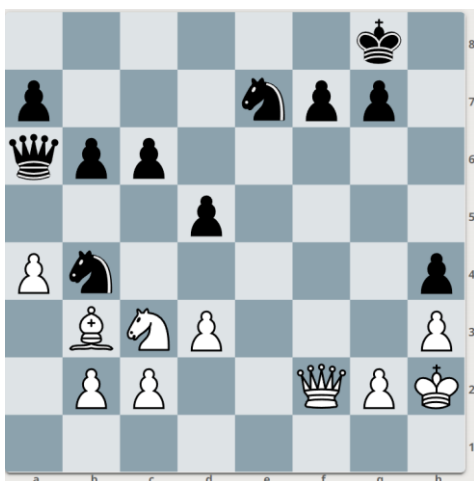

5 – Black to move. Find the fork

6 – White to move. Find the fork

7 – White to move. Find the fork

8 – White to move. Find the best fork (there are a couple to choose from, but only one queen fork here is strong)
