AMG UK GROUP 2006 PENSION PLAN YEAR ENDED 31 DECEMBER 2021

It is helpful to provide the context for the investment returns and charges presented above. If savings were not invested at all (i.e. there were no investment returns or fees) then, according to our modelling, the value of the "Average" and "Younger" members' pots at retirement would be £146,366 and £100,307 respectively in today's money.

Assumptions

The above illustrations have been produced for an "average" member and a "younger" member of the Plan based on the Plan's membership data. The "Default Strategy" illustration assumes the member's asset allocation remains fully invested in the current default strategy. The individual fund illustrations assume 100% of the member's assets are invested in that fund up to the Plan retirement age. The results are presented in real terms, i.e. in today's money to help members have a better understanding of what their pension pot could buy in today's terms, should they invest in the funds above as shown.

You will note that the total fee figure is lower than the difference between the pot size before and after fees. The total fee reflects what has actually been taken from the pot to pay for the management of assets and other expenses, whereas the difference between before and after fee pot values reflects the effect of missed investment returns on the fees deducted.

| Ago | 1 | | | | |
|--|--|---|--|--|--|
| Age • "Average" member | 43 (the average age | of the Plan's membership) | | | |
| "Young" member | 25 (the average age of the youngest 10% of members) | | | | |
| Plan Retirement Age (Member aged 43) | 68 | | | | |
| Plan Retirement Age (Member aged 25) | 68 | | | | |
| Starting Pot Size | | | | | |
| "Average" member | £54,000 (the median pot size of the Plan's membership) | | | | |
| "Young" member | £4,000 (the median) | pot size for the youngest 10% of members) | | | |
| Pensionable Salary | 1 | | | | |
| "Average" member | £32,000 (the median | pensionable salary of the Plan's membership) | | | |
