ANNUAL PERFORMANCE (%)

12 months to 31 March	2022	2021	2020	2019	2018
Fund	21.97	1.75	-0.02	2.82	7.47
Benchmark	23.14	2.46	-0.02	4.78	10.02
Relative	-1.17	-0.71	0.00	-1.96	-2.55

All performance periods over a year will be annualised. Source: LGIM. Performance based on daily close mid-market prices after the deduction of our standard investment management fees, which may or may not be the same for your scheme. Please refer to your scheme literature, or to your scheme administrator, for the fee rate that applies to your scheme. The assumption for this calculation is 70 basis points. The MSCI/AREF UK Quarterly All Balanced Property Fund Index is reported on a net only basis. **Past performance is not a guide to the future.**

FUND CHARACTERISTICS

The fund invests in UK freehold and leasehold property recognising that superior stock selection is a key driver of outperformance. The fund does not permit gearing on directly held assets. The fund may invest in indirect vehicles and property derivatives.

Please note that the name of the benchmark has been updated to reflect the MSCI acquisition of IPD Group

LGIM PROPERTY FUND MANAGEMENT TEAM

The Fund is managed by Rob Codling. The Fund team also includes an assistant fund manager and seven Asset Managers. This team is supported by LGIM RA's wider platform capabilities in Transactions; Research; Sector Specialism; Sustainability; Derivatives; and Planning and Development.

RISK AND REWARD PROFILE

The summary risk indicator does not capture the likelihood of tenants paying their rents on the properties that this fund owns.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

PMC KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from your investment is not guaranteed and therefore you may receive a lower or higher return than you anticipated. There will be a variation in performance between funds with similar objectives due to the different assets selected.
- PMC's charges and associated transaction costs are subject to change, with notice for the former and without notice for the latter. Charges and transactions costs deducted from the policy reduce your potential for capital growth in the future.
- Tax rules and the treatment of income and capital gains could change in the future and may be applied retrospectively.
- Inflation reduces the purchasing power of money over time as the cost of purchasing goods and services increases. If the rate of inflation exceeds the rate of return on your portfolio, it will erode the value of your portfolio and its investments in real terms.
- In extreme market conditions it may be difficult to realise assets held for a fund and it may not be possible to redeem units at short notice. We may have to delay acting on your instructions to sell or the price at which you cancel the units may be lower than you anticipated.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made.
- PMC seeks to mitigate counterparty risk wherever possible on behalf of its policyholders through a variety of measures which include: each fund's non-cash assets being held with independent custodians, sweeping cash (where appropriate) overnight into the LGIM's range of Liquidity funds (above a de minimus level), using the delivery versus payment system when settling transactions and the use of central clearing for exchange traded derivatives and forward foreign exchange transactions. However, in the event of the failure of a counterparty, custodian or issuer there is a residual risk that a fund may suffer asset losses which are unrecoverable.
