## HISTORICAL PRESERVATION FOUNDATION, INC.

This update is being provided to give the people watching our website, information on the progress with the Stidger renovation project. Aside from just keeping the home secure, on till now, we have recently removed the trees in anticipation of the next step, which will be the dismantling of the cabin. This is necessary to be able to prepare for the a-mount of logs needed to be replaced at the time of reconstruction.

When will this occur? We have our first grant in the bank, \$5000.00. We have 2 more grants waiting to be accepted. If we receive both or either one, our plan is to proceed with the start of dismantling. If you would like to help, you can go to our DONATE section and make a donation!

All information regarding this project is available on our Home Page, address and map of roads to get there. As of now we do not have any hours of operation. More to be posted as it comes in.

We want to thank everyone who have been following this site for your interest and can assure you that we are just as anxious as you to bring this project to its conclusion. This pandemic has not helped!

The Staff
