

Our Story (Part 1 of 3)

Did you know that 99% of the molecules that make up your body are water? This is according to the *Hydration Foundation*, a leading research organization focused on cellular hydration. At *Spring Aqua*, our goal is to give your body water that is clean, hydrating, and life-promoting.

There are several world-famous mountain springs that attract millions of people annually because of the healing properties of the water. The *Netflix* documentary *Down to Earth* features Zac Efron and Darin Olien's visit to Lourdes Springs in France. Lourdes Springs is home to one of the most famous healing shrines in the world, it receives 4-6 million visitors a year. Many of the visitors seek cures they believe come from drinking or bathing in the water. Scientists have studied this spring water since the late 1800's hoping to unlock the mysteries and documenting these miraculous results. *Spring Aqua* has developed our own version of Lourdes water through mimicking the rock layers, geology, and other properties outlined in scientific studies. As a result, we have created a complete water hydration technology that you can have right in your own home. We call it an *Ecosystem in a Box*.

Why we are Different

(Part 2 of 3)

There are many ways to treat drinking water - reverse osmosis, distillers, filters, bottled water, all ranging in cost and quality. These focus on purification, but are overlooking something essential - the ability to *sufficiently hydrate*. Did you ever drink a large quantity of water but still felt dehydrated? This is because at the cellular level, the water is not being absorbed, which can have negative consequences. Studies have shown that by being just 2% dehydrated you can lose up to half of your cognitive abilities. Being 10% dehydrated can lead to chronic illness. Hydration is essential. It is the fountain of youth and the foundation to health.

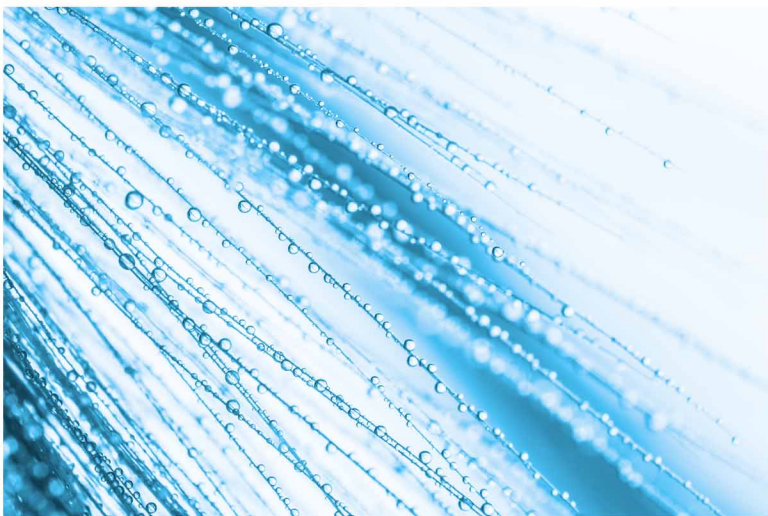

Are you trying to drink 8 glasses of water a day? What if the amount of water really isn't the real issue? Anthropologist Gina Bria, Founder of the *Hydration Foundation* and author of the book *Quench*, discovered that people living in indigenous deserts were better hydrated than the average American - because they were eating plants to hydrate themselves. How could that be? The water in the plants is *structured* water.

We're all familiar with the three phases of water - liquid, solid (ice), and gas (steam). But the discovery of structured water introduced to us a 4th phase, where water can take on a gel or plasma-like form. Structured water is 10% denser and more organized and

concentrated at the molecular level, allowing for faster absorption. New research is showing us how the health of our cells is directly tied to the structure of the water inside.

The human body must structure the water we take in to make it bio-available (able to be absorbed on the cellular level). *Spring Aqua* has successfully replicated the process by which plants are able to structure water. The result is that one glass of *Spring Aqua* water may be equal to 2 or more glasses of typical filtered water in hydration value.

WET Technology

(Part 3 of 3)

Spring Aqua takes regular tap water and creates water that is clean, hydrating and life promoting. Our filters remove all harmful chemicals and contaminants, but that's only the beginning. In addition to properly structuring the water, we boost its power by adding dissolved molecular hydrogen, which is stabilized, unlike tablets and ionizers.

Hydrogen enhanced water is a powerful antioxidant. *Spring Aqua* water has a hydrogen concentration of 1.4 to 1.6 ppm/L. One liter of water may be equal to consuming 750 bananas, or 35 carrots, or 4 bags of spinach in antioxidant value. If you noticed the similarity between the terms *hydrogen* and *hydration*, that's because hydration is all about getting the hydrogen into the cells. The dense, organized molecular *structure* is what allows that hydrogen to be effectively taken in and utilized.

The third element missing in most filtered water is the minerals that get stripped out. *Spring Aqua* replenishes them in a bio-available ionized form.

Structure. Hydrogen. Ionized Minerals.

This is what we call WET Technology. It uses no electricity, no plastic bottles, and no water is wasted. It is an award-winning eco-friendly product (recognized by the WIIPA *World Invention Intellectual Property Associations*) and certified by *SGS*, the world's largest provider of inspection, verification, testing, and certification services. Our filter certification data is publicly available.

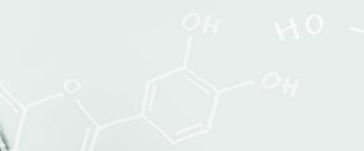

Spring Aqua is recommended by the *Hydration Foundation*. We want YOU to Rediscover Real Hydration.

"You can drink less with *Spring Aqua*, yet be better hydrated."

- Gina Bria, Founder of Hydration Foundation.

AWAKE TECHNOLOGY

	Right Handle Water: Structured, Mineral, Hydrogen, and alkaline pH 9.0-9.5 (drinking, antioxidant)
	Left Handle Water: Structured, Mineral, pH 7.4-7.8 (drinking, cooking, soaking)

WET Technology	WET Technology 7
Product Name	Ultimate Hydration System
Technology Release Date	March 2019
Structured Water	Multi-Layered Process
Minerals (with Maifan Stone)	Ultra Pure Grade
Microclustering	Advanced
Hydrogen	Dissolved Hydrogen 1.4-1.6ppm
Hydrogen Water Output	1 gallon per 1/2 hour
Filter Design	Specialized Dedicated Filters
Types of Water	Bifunctional Water
Oxidation Reduction Potential (ORP)	(-750)mv +/- 100
Nano Tech (cleans & disinfects)	Dual Nano Tech
Filter Maintenance	12-18 months, 14-19 Filters \$375 + Pre Filters (price determined by zip code zone)
Starting Price*	\$3795.00 0% Financing or as low as \$49/mo

*Sales Tax not included yet. Financing pending credit approval. Shipping fees: WET7 New System \$75-90, Filter Renewals: P1 at \$4.95. 12-18mo at \$24.95

Filter Maintenance

Zone 1 New York, NY Hartford, CT Portland, OR			Filter Change Frequency		Loyalty Subscription Savings		
			Family of 2	Family of 3 or more	10%	5%	None
More Often	Pre- Filters #1		6 Months	5 Months	\$19.80	\$20.90	\$22.00
Long Term	WET 7		12-18 Months or 1600 Gallons		\$375	\$396	\$416

Zone 2 Seattle, WA Boise, ID Atlanta, GA			Filter Change Frequency		Loyalty Subscription Savings		
			Family of 2	Family of 3 or more	10%	5%	None
More Often	Pre- Filters #1		5 Months	4 Months	\$19.80	\$20.90	\$22.00
Long Term	WET 7		12-18 Months or 1600 Gallons		\$375	\$396	\$416

Zone 3 Los Angeles, CA Chicago, IL Dallas, TX Washington, DC			Filter Change Frequency		Loyalty Subscription Savings		
			Family of 2	Family of 3 or more	10%	5%	None
More Often	Pre- Filters #1		4 Months	3 Months	\$19.80	\$20.90	\$22.00
Long Term	WET 7		12-18 Months or 1600 Gallons		\$375 + \$36 (P2 + P3 Pre- Filters) \$411	\$396 + \$38 (P2 + P3 Pre- Filters) \$434	\$416 + \$40 (P2 + P3 Pre- Filters) \$456

Filter Maintenance
