

Effective June 15, 2011:

The Woodbridge Station Board has expanded the fence staining options beyond clear and the Sherwin Williams stain in "Pinecone", both of which remain acceptable finishes. Also, the following list contains stains which are acceptable on fences. Please note that un-natural wood colored stains are not on this list. Dark and solid stains are also not approved. The stains below are transparent, translucent, or semi-transparent. Please submit a DRC form indicating stain choice prior to starting your project. Thank you
