

A New Day Has Dawned For Herbicide Resistance...

X-CELERATE

www.x-celerateit.com

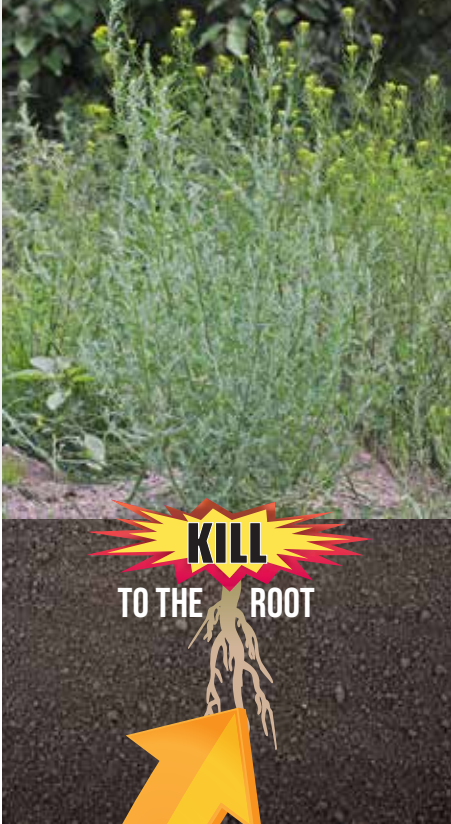

We know with traditional herbicides, 30 percent of the product is lost upon contact. Of the remaining 70 percent, 95 percent remains in the leaves, never penetrating deep enough to be effective against herbicide resistant weeds like Kochia. From the 128 ounces in a gallon of the leading herbicide, only 4.5 oz. ever penetrate deeper than the leaf.

Making a Difference You Won't Believe !

"In my 35 plus years in the fertilizer industry, it was amazing to me of how well my field turned out after using X-CELERATE. To achieve this in just one pass instead of multiple passes is a huge savings in both time and money."

- Glenn Hawes, Anderson, CA.

X-CELERATE will take it from the leaf to the root !
