TESTIMONIALS

Olivier worked on a highly complex data project, which required not only deep technical expertise but also exceptional leadership and stakeholder management skills.

Initially brought in to design the Power Platform requirements, he quickly took on more of an overarching architect role in the project. His ability to navigate the complexities of the data issues and collaborate effectively with our data architect ensured that we identified and implemented the best solutions. He built relationships quickly, fostered credibility quickly and received excellent feedback from senior internal stakeholders.

Olivier guided the team through a very challenging discovery phases. With numerous stakeholders presenting conflicting directions and priorities, he ensured that every perspective was captured, escalated where necessary, and documented with proposed solutions.

His structured approach fostered focused discussions, allowing the delivery manager to understand technical blockers and decisions required and to guide the customer toward understanding their true needs and potential challenges.

Beyond his project responsibilities, Olivier played a crucial role in driving best practices within the team and supported additional pre-sales activities. His mindset of asking the right questions ensures that solutions are not just technically focused, and he ensures commercial awareness of proposed solutions and is outcome focused. His passion for the Power Platform and its potential to drive business change was evident in everything he did. I highly recommend Olivier for any future projects. His professionalism, technical acumen, and leadership skills make him an invaluable asset to any team.

Vickie Stevenson - Head of MS Apps Capability - Version 1

STRENGTHS

Architecture
Designed and built an O365 solution designed for global sales lead generation with case exchange and integration with 3rd party CRM.

Strategy
Always looking ahead to understand how clients can make the most of the technology stack.

Agility
Ability to adapt to any situation and any role. Acquired through persistence, hard work, a curious attitude and a desire to always find a better way.
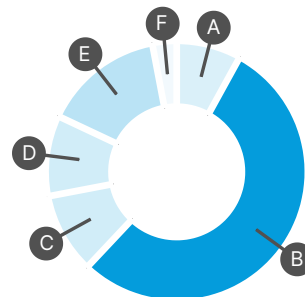

Efficiency
Belief that if our technology isn't making our lives easier, more efficient and more cost-effective, then we're doing it wrong.

Rubik's Cube & Mechanical Puzzles
Master of the 3×3, 4×4, 5×5, 9×9, Petaminx, Gear ball & Fisher Cube Rubik's puzzles. Keen mechanical and sequential discovery puzzle enthusiast. Ability to identify patterns, solve complex problems & track multiple moving pieces.

A DAY IN MY LIFE

- A Data migration
- B Solution design, build, implementation
- C Documentation
- D Evangelism and support
- E Reporting & Data Analysis
- F Coffee & Mechanical Puzzles

TESTIMONIALS

Olivier joined the Power Platform CoP as a SME from Consulting. He is highly skilled and experienced in the Power Platform suite and provides valuable support for any Power Platform queries from the business.

Olivier contributed tremendously when allocated as the Power Platform SME for Stack Overflow – a technical developer community Q&A and support platform – where he was able to input and contribute the most technical knowledge, earning him first prize and the highest reputation score.

Olivier is invited to many meetings with the business and internal technical and global teams to provide his experience and inputs into shaping the governance and guardrails around the adoption of the Power Platform for the UK. Olivier is fairly new to the firm but hands already collaborated with various teams to share his knowledge and experience. He exemplifies various PwC professional competences such as whole leadership, business acumen, working together and making a difference. I look forward to continuing to work with Olivier in shaping the Power Platform space.

Nilesh Solanki

I had the pleasure of working with Olivier for almost 2 years at LR. He is a rare breed in that, although he has an amazing level of technical competence, he also possesses superb interpersonal skills and the ability to understand business problems and then solve them. Coupled with that is an indefatigable drive to get projects over the line. I saw him jump mountains to deliver successful value adding Office 365 solutions. I can't recommend him highly enough.

Mike Bartley

Olivier manages an enormous volume of time critical work with efficiency and accuracy. A very approachable character who is firm but fair, handling his workload with great humour and professionalism. I welcome the opportunity to work with Olivier again.
