

# Joint Production Sale

## Saturday, February 18, 2023

Hub City Livestock. Aberdeen, SD  
1 p.m. CST (Red Angus) - 1:45 p.m. CST (Simmental)

Flittie Simmental // Schnabel Simmental // Lazy J Bar Ranch

*Selling* 90 Simmental Bulls - 40 Red Angus Bulls

Lot 1 - MR FR K1

Lot 50 - MR SR K1629

Lot 301 - LAZYJ STOCKMARKET 211-998

Lot 4 - MR FR K4

Lot 81 - MR SR K2051

Lot 312 - LAZYJ STOCKMARKET 226-5220

**DVAuction** Catalog and videos will be available online at [www.dvauction.com](http://www.dvauction.com).

# Sale Information

## Joint Production Sale **Saturday, February 18, 2023**

Hub City Livestock, Aberdeen, SD – 1 p.m. CST (Red Angus) – 1:45 p.m. (Simmental)

Flittie Simmental // Schnabel Simmental // Lazy J Bar Ranch

### *Sale Day Phone*

### *Insurance*

Katie Williams.....(605) 770-9986

### *Sale Order*

All Red Angus bulls will sell at 1p.m. in catalog order. Simmental bulls to follow starting at approximately 1:45 p.m. with alternating lots between Flittie and Schnabel bulls. Sale order will be on the supplement sheet posted on DVAuction 12 hours before the sale.

### *Trucking*

Haul your purchase on sale day and receive a \$100 discount.

### *Delivery*

Delivery will be available at the least possible cost to the buyer

### *Feeding*

Bulls will be fed free of charge till March 15th. After that there will be a \$4/day/head charge.

### *Retained Interest*

One-third semen interest will be retained by the consignors.

### *Online Broadcast*

The sale will be broadcast live on:

Welcome to our 2023 production sale. It is hard to believe how fast 2022 flew by. It's been a busy year between chasing the kids around throughout various sports seasons, 4-H activities, and managing all the cattle and crops. We are a family operation and all 4 of our kids are always out helping and developing a passion for the cattle, just ask the kids and they will probably talk your ear off about their favorite ones they have.

We focus very hard on having a strong maternal cow herd. I always say you can't build a house on a weak foundation, and I feel that is the same for a cow herd, you need a solid foundation to develop cattle that will be functional and marketable. We do NOT creep feed any of the calves, as we expect them to grow & excel with mother's milk and grass alone. Disposition is EXTREMELY important to us with the kids always with the cows.

The bulls are being fed similar rations that we have used for the last few years developed by Dewayne Siebrasse of Cattlecents Consulting (605-228-5788). He has developed rations to achieve maximum growth while keeping the bulls athletically sound and to have longevity. The rations this year we are using only 6# of corn along with a combination of oat/pea haylage, corn silage, oats hay, alfalfa hay, and 1.5 oz RIO backgrounder loose mineral. We might sacrifice a little in ADG but feel we will have better longevity. All our feedstuffs are 100% homegrown. They also always have free-choice salt and Rio Nutrition tubs.

All cattle are on a strict herd health program put together with the Hosmer Vet Clinic (Dr. Holly Roe Johnson 605-283-2278). All bulls are DNA tested with genomically-enhanced EPDs, parent verified, coat color, horn/poll, ADG, adj. YW, carcass ultrasound and scrotal measurements. Supplement sheets will be available sale day for any information that didn't make the catalog as well as have RightChoice scores. Again, this year we will be retaining 1/3 semen interest on all the bulls. You will be buying full possession and 2/3 semen rights.

Thank you for your interest in our program. Please feel free to contact us at any time, follow us on Facebook, or visit our website [www.srsimms.com](http://www.srsimms.com) to learn more about the cattle. Visitors are always welcome to view the bulls prior to the sale.

Thanks,

*Tom & Meghan Schnabel, Schnabel Ranch Simmentals*

*Peyton (13), Mallory (11), Danyelle (10), Korbyn (7)*

Welcome to our 2023 Simmental Bull Sale! This will be the 41st year of selling Simmental and SimAngus bulls. Every year we seem to add a few more customers but many people who bought bulls in the early years are still good customers today.

This year, the bulls didn't get weaned until mid-November due to the ice and snow storms. They really took off at weaning and have been doing quite well. The ration is the same as in the past – ground hay, corn silage (with corn in it this year), modified distillers and rolled corn.

All cattle are on a strict herd health program with the help of the Hosmen Vet Clinic.

The bulls have been DNA tested and have enhanced EPDs. This year, all the results are listed in the catalog. Yearling weights, rate of gain and scrotal measurements will be on a supplement sheet at the sale.

Visitors are welcome to view the bulls prior to the sale at the ranch.

Thank you,

*Bruce Flittie, Flittie Simmentals*

Welcome

Welcome to our annual bull sale! We have been raising registered Red Angus cattle for over 30 years and in the cattle business all our lives, so I guess you would say it's not just a fad for us.

We feel this year's offering is one of the strongest and most balanced we have ever offered. With the low supply in the cattle industry, we will start to see a rebuilding phase. With that being said, the Red Angus female is the most demanded female. We have never been an operation that chases single trait selection. These bulls offer the total package: calving ease, carcass and maternal.

We will have video footage of the bulls the week prior to the sale. The bulls will be at Hub City on Friday before the sale for you to sort through. They have been on a strict herd health program. We will have carcass ultrasound data available sale day. They have genomic enhanced EPDs and are parent verified. Some are enrolled in the Top Dollar program. They will also be semen checked prior to sale day.

**ALL THE RED ANGUS BULLS WILL SELL AT 1PM IN CATALOG ORDER.** The Flittie and Schnabel bulls will sell immediately after the Red Angus, approximately 1:45 pm. Sale supplement sheets will be available sale day.

Hope to see you sale day! If not, you are always welcome to stop in for a visit! As always, don't forget about our goat sale April 22, 2023 broadcast live on Dv Auction.

Sit down, buckle up and buy Red! I think we have some exciting times ahead!

*John and the Crew at Lazy J Bar Ranch*

*Steph, Kale and Jacob*

## PREMIUM CALF VALUE

*Easy as 1-2-3*

### Want MORE for your steers?

**THAT'S EASY ...**

1. Purchase Top Dollar Angus-qualified bulls.
2. Raise Top Dollar Angus-qualified feeder calves.
3. Pocket MORE per head!

**THE RESULTS:** Better performance and a documented \$84.26-per-head advantage as fed cattle!

Steers & Heifers	Top Dollar Angus		Difference
	Qualified	Non-Qualified	
Head Count	1,801	4,448	
Percentage of Head Count	29%	71%	
Average Daily Gain	4.28	3.99	0.29
Hot Carcass Weight	935	888	47
Marbling	504	471	33
Ribeye Area	15.4	15.2	0.2
Fat Thickness	0.66	0.61	0.05
<b>Value Per Head</b>	<b>\$1,626.13</b>	<b>\$1,541.86</b>	<b>\$84.26</b>

**The PROOF**  
is in your bank account.

Better genetics are being rewarded in marketplaces all over this nation. Choosing great genetics from herds associated with Allied Genetic Resources puts you the position to take advantages of these opportunities and so many more as we look toward the future. The Allied logo stands for quality, it stands for commitment to the future and it means that you can expect the very best in customer services, year after year. There is no room in the future of the beef business for average genetics and no producer should settle for less than profit improvement with each new set of bulls and each new generation.

Once you have made the choice to use genetics backed by the industry leading herds using the Allied logo, take the next step and look to Allied for services. Our growing list of feeder cattle marketing specialists are there to help produce more dollars for loads of calves that deserve them. Our consulting services too are available as you navigate a world with ever more advanced genetic tools for selection and progress. Regardless of your specific needs, when it comes to genetics for the future, we simply offer more. This year our members will market nearly 10,000 commercially focused bulls, all from the 26 states that they call home. The Allied program is backed by a national presence but is based on a locally produced and serviced product from the very best and most experienced group of independent seedstock producers. Contact any one of our service-oriented staff to learn more about the value proposition offered by Allied and the producers that own it.

## Sale Terms & Conditions

**TERMS:** Terms of the sale are cash, check, sight draft or other terms agreed to in writing between seller, buyer, and sale manager payable immediately upon conclusion of the sale and before animals will be moved. Sale manager reserves the right to require a certified check as settlement before releasing any cattle.

**PURCHASER'S RISK:** All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

**BIDDING:** Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

**ANNOUNCEMENTS:** Any errors or changes in information contained in the catalog will be announced from the auction block and such announcements shall take precedence over information contained herein.

**HEALTH:** All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold. Arrangements for International Shipments should be made with the sale manager prior to the auction.

All efforts for the exportation of cattle can be arranged through sale management.

**BREEDING GUARANTEE:** All animals are guaranteed by the seller as outlined by the American Simmental Association. Guarantees will be handled on an individual basis, with credit towards another animal.

**LIABILITIES:** All persons who attend the sale do so at their own risk. The seller, Hub City Livestock, and sale manager assume no liability for any accidents that may occur. Neither does the seller, Hub City Livestock or sale manager assume any liability for loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and seller. They are not responsible in any way for the failure on the part of the buyer and seller to live up to his obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action, that may in exceptional cases be taken, must be between the buyer and seller. This catalog has been prepared by the Sale Manager from pedigrees and information supplied to them by sources deemed reliable; however, the Sale Manager will in no way guarantee the pedigree, percentage of the animals selling, or data included in this catalog. Any exceptions taken are between buyer and seller.

**CONTRACT:** The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

**MAIL BIDS:** Mail or wire bids may be furnished. Bids must be in the hands of the sale manager in ample time prior to sale date and will be handled in strict confidence.

**PHONE BIDS:** Telephone bids will be taken by the sale manager and will be treated in strict confidence. Sale day phone numbers are:  
Hub City Livestock ..... (605) 225-3273 or (800) 889-3273  
Jim Scheel ..... (605) 545-1521

## BULL BUYER'S QUICK GUIDE TO ASA EPDS AND \$ INDEXES

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists.

A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

**\$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a \$50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

### Explanation of How to Utilize API and TI Indexes

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described to the left, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a \$50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more information, visit [www.simmental.org](http://www.simmental.org).

### Definitions of Terms

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels.

**Back Fat (BF):** Inches of backfat.

**Birth Weight (BW):** Pounds of birth weight.

**Calving Ease (CE):** Percent of unassisted births when used on heifers.

**Carcass Weight (CW):** Pounds of carcass weight.

**Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.

**Milk (MLK):** Pounds of weaning weight due to milk.

**Marbling (MRB):** Marbling score.

**Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.

**Ribeye Area (REA):** Square inches of ribeye.

**Warner-Bratzler Shear Force (WBSF):** Pounds of force required to shear a steak.

**Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario.

**Weaning Weight (WW):** Pounds of weaning weight.

**Yearling Weight (YW):** Pounds of yearling weight.

**Yield Grade (YG):** Yield grade score.

# Sale Information

## TESTICLE MEASUREMENTS

Testicular size is an indicator of puberty in both bulls and females, so selecting bulls with larger scrotal circumference measurements will not only ensure you of a bull who can service more cows over a given period of time, but will also provide you with daughters who will cycle earlier.

### Recommendations for Scrotal Circumference

	Months of Age			
	12-14	15-20	21-30	30+
Excellent	35	37	39	40
Good	30-35	31-37	32-39	33-40
Poor	30	31	32	33

All measurements are expressed in centimeters.

## GENOMICALLY-ENHANCED EPDS

All the bulls of both breeds have been genetically profiled through Igenity to enhance the accuracy of their EPDs, verify parentage and, on the Simmentals, determine polledness and color.

## RED ANGUS GUIDE TO EPDS

[RedAngus.org](http://RedAngus.org)

**ProS**..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB**..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM**..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED**..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW**..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW**..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW**..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG**..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI**..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK**..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME**..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG**..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM**..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY**..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB**..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG**..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW**..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA**..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT**..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Hetero-black and homo-polled. Goes back to a good red cow family. He is the youngest bull in the sale and still recorded an actual WW of 712#.

# Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

**ACCREDITED CALVING EASE** – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

**ACCREDITED TERMINAL MATE** – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

**ACCREDITED GENOMIC PLUS** – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

This guy's mother sure outdid herself for her first time. This calf isn't your typical Imperial calf with the extra growth he carries. 7 of his EPDs are in the top 10% or better and a 119 WW ratio. He does have a small absence under his jaw that he's had since he was young, but it didn't hinder him a bit.

Can-Am was a new sire we sampled from our good friends, G&D Simmentals. He offers total outcross genetics to most of the US red pedigrees. This calf doesn't have that "flashy" EPD profile, but he has the looks that everyone wants. Pure power with a 106 WW ratio out of an absolute NO-MISS cow. Maternal brothers working for Jim Shroeder and Chris Erdmann as well as putting 2 females back in the herd for us and we retained her first calf as a herd sire.

These Stockmarket sons are a new sire group for us and we can not say we are disappointed. We are pleased with how they have developed. This bull goes back to that little ol Brown cow that John harrassed Steph over buying for years but she definitely earned her keep and found her way to the donor pen. Jacob had halter broke this calf last fall so he is pretty tame.

Calving ease sire with a little extra style and muscle. Won't give up any performance on this one. A little outcross pedigree for most on the dam's side.

The granddam, 421 was around here until age 17. Her feet and udder were the best of any cow in the country. We have kept every female we could including her ET Chateau 744 heifer calf this year. Use this bull for a little longevity in your herd.

Younger but bigger framed bull owned by Kale. His dam always puts a good one down on the ground but if you the study pedigree, you will notice the influence on the maternal side in Steph's cattle herd since 1988.

Normally we don't keep a calf this young but this one kept catching our eye. If you don't breed cows early, this is one you should look at.

# PARAMOUNT

**Elevate to a more valuable female.**

For over a decade, Red Angus females have commanded more at auction than all other breeds, including Angus. According to Superior Livestock data, Red Angus heifers brought nearly \$17/cwt more – **that equates to a \$92/head premium on a weaned replacement female.**

**To learn more about industry-leading stayability, visit [RedAngus.org](http://RedAngus.org)**
