Vision

To pioneer sustainable Environmental Biotechnology solutions that restore balance to Ecosystems, Reduce Pollution, and Create a Cleaner, Healthier Future for Communities and Industries.

Mission

To develop and deliver innovative microbial and biotech products that enhance wastewater treatment, waste-to-energy conversion, and ecological restoration, while promoting circular economy practices and environmental responsibility.

01

Develop eco-friendly microbial solutions that address wastewater, solid waste, and septic challenges through advanced environmental biotechnology.

02

Promote sustainable practices by converting waste into resources, reducing pollution, and supporting circular economy models.

03

Deliver reliable, customized biocultures that enhance performance in STPs, ETPs, biogas plants, and ecological restoration projects.

04

Empower industries and communities with innovative biotech products that ensure long-term environmental health and compliance.

Quality Policy

We are committed towards providing customers with service of the highest possible level of Quality. In order to achieve this, we are continually improving our processes, products and services, meeting and exceeding satisfaction of the customers at all times complying with statutory and regulatory requirements.

01 Desire

We strive to consistently innovate and deliver world-class environmental biotech products that exceed customer expectations and contribute to a sustainable future.

02 Responsibility

We are committed to maintaining the highest standards of quality, safety, and compliance in every stage of product development, manufacturing, and service. Adhere strictly to ISO 9001 & ISO 14000 standards for quality and environmental management.

03 Relations

We foster strong and transparent relationships with our customers, partners, & stakeholders, ensuring mutual trust, collaboration, & long-term value creation. Collaborate with industries for innovative & sustainable solutions.

04 Creative

We embrace creativity and scientific excellence to design unique microbial solutions that address complex environmental challenges effectively. Invest in R&D to create unique, market-leading environmental biotech products.

Micro entrepreneurs are indeed the backbone of the economy with over 10.76 crore individuals being employed and are a significant contribution to the country's gross domestic product. Hence, efforts of entrepreneurs are vital in driving the nation's economic aspirations, said D. Shanmugasundaram, chairman of Confederation of Indian Industry (CII), Erode Zone, here on Thursday.

- More than **750+ Internships** offered to Science & Technology UG/PG Graduates on Entrepreneurial Development Skills.
- EBPL Represented in more than **250+ Programs** as invited Guest Lectures/Chief Guest on Entrepreneurship promotion..

Managing Director

Dr. K. INDUMATHY ARAVINDH, M.Sc., Ph.D.

At ELIES Biotech Private Limited, our journey is guided by a simple but powerful belief: nature already holds the solutions to many of humanity's toughest challenges—our task is to unlock them responsibly and deliver them where they matter most.

Since our inception in 2019, we have focused on agricultural and environmental biotechnology, developing eco-benign microbial formulations that improve soil health, optimise wastewater treatment, accelerate composting, and support sustainable farming. Our R&D pipeline is fuelled by rigorous microbial bioprospecting, state-of-the-art molecular characterisation, and an unrelenting commitment to quality and regulatory excellence (ISO 9001, ISO 14000 & MSME ZED Bronze).

But technology alone is not enough. Real impact happens when knowledge is shared. That is why ELIES pairs every product with data-driven implementation protocols and continual technical support—empowering farmers, industries, and communities to achieve measurable results in resource efficiency, compliance, and environmental stewardship.

Looking ahead, we will deepen our collaborations with strategic partners to translate frontier research into practical innovations—whether that is harnessing microbial consortia for climate-smart agriculture, scaling bio-based alternatives to chemical inputs, or advancing circular-economy solutions for solid and liquid waste.

To our customers, collaborators, and team members—thank you for trusting and championing our mission. Together, we can cultivate a more resilient planet, where microbial intelligence meets human ingenuity for the benefit of society and the environment. Join us as we continue to push the boundaries of biotechnology, one microbe at a time.

Executive Director & CSO

Dr. S. ARAVINDH, M.Sc., Ph.D.

At ELIES Biotech Private Limited, we believe in the transformative power of biotechnology to restore balance between industry, agriculture, and the environment. My personal and professional journey—spanning over 20 years across Research, Academia, Industry, and Marketing in Life Sciences—has shaped the core philosophy of our company: eco-benign innovation rooted in scientific integrity and practical relevance.

With a Ph.D. in Environmental Microbiology and Nano Bioscience from Anna University, and research experience at institutions like DAE-IGCAR, BARC Facilities, PSG-IAS, and several central and state universities, my focus has always been on Biodegradation, Bioremediation, and Sustainable Biotechnological interventions. I have also worked extensively in the food industry, ensuring Quality and Regulatory compliance in line with global certifications (ISO 17025:2005, ISO 22000:2005 FSMS, BRC, HALAL, KOSHER, EIA-EU norms), and taught future microbiologists during my tenure as an Assistant Professor in postgraduate microbiology education.

In 2018, along with my wife and co-founder Dr. Indumathy Aravindh, we transformed our shared passion for biosciences into a mission-driven venture—ELIES Biotech Private Limited—with a clear purpose: to develop microbial and environmental biotech products that are effective, affordable, and environmentally sustainable. Our company was formally incorporated in 2019 and is headquartered in our hometown in Erode District, Tamil Nadu.

Today, ELIES stands as a growing name in the field of agricultural and environmental biotechnology, offering solutions for soil rejuvenation, composting, wastewater treatment, biogas enhancement, and more. We combine cutting-edge R&D with field-level practicality, and ensure that every product is backed by scientific rigor and customer support.

As a director, my commitment is to foster a culture of innovation, transparency, and shared growth—within our team, with our partners, and among the communities we serve. I believe that true leadership lies in listening to novel ideas, nurturing scientific curiosity, and empowering teams to tackle challenges together.

We thank all our collaborators, clients, and supporters for believing in our vision. Let us continue working together to harness the power of microbes for a cleaner, healthier, and more sustainable future.
