

COVID PREVENTION POLICY (Board Approved 03/15/2022)

The frequency of Covid cases is steadily decreasing in Sarasota county, meaning that the probability of coming in contact with the virus may be decreasing. People are continuing to get vaccinated, also resulting in fewer cases.

Mask mandates are being lifted in many circumstances by government and business. .

In keeping with these trends, RSA will no longer require mask wearing in all indoor common areas.

It is suggested that those individuals who are concerned about risk or are at higher risk of contracting the virus continue to wear masks.

Our elevators are potentially higher risk areas due to their closed environment. As such, anyone already using an elevator shall have the right to ask that others do not ride with them.

COVID PREVENTION COMMITTEE:

Ann Loudermilk, MD
