

# POINT DUME STRATEGY

## Growth

The Point Dume Strategy is a growth portfolio designed for participation in rising and recovering market environments.

Strategic, fundamental and quantitative methods guide overall risk exposure and seek to avoid the impact of large declines and bear markets.

Strategically designed to grow wealth. Disciplined rules to guard it.

### Investor Benefits

Global stocks offer the best return opportunity and bonds add income and stability for **global asset class and multi-factor diversification**. **Vehicles for asset class exposure** are determined based on liquidity, price volatility and alpha.

Your **strategic** asset allocation **optimizes risk-adjusted returns** using long-dated historical returns and volatility data to meet your unique investment goals and financial life (**never one-size-fits-all**). **Allocations are calibrated** based on a price-driven overlay.

Positions are selected by identifying most potential for beneficial outcomes. Holdings are eliminated using **quantitative decision rules** designed to **cut bear market exposure and preserve wealth**.

### Unusual diversification across global asset classes to optimize return for risk.
