

MASA (Minnesota Amateur Spacemodeler Association), founded in 1998, is an active rocketry club with members from the Twin Cities and surrounding areas. MASA is dedicated to the safe and fun pursuit of the rocketry hobby.

MASA is a registered section (Section #576) of the National Association of Rocketry (NAR). MASA has been recognized by the NAR as "Medium-Sized Section of the Year" (2006 & 2007), has received the NAR's North American Rockwell Trophy for best newsletter (2008, 2009, & 2010), and has hosted NARCON (the NAR's Annual National Convention) in 2007 and 2008.

MASA has official monthly club launches year round on the 4th Saturday (weather dependent) at one of several different ranges in Twin Cities metro. We also hold club meetings on the 1st Thursday evening of most cooler months, typically at Hennipen County Libraries. We hold a picnic each summer and a Holiday Party at the end of the year. MASA also participates in numerous rocketry outreach and STEM activities supporting Cub Scouts, Girl Scouts, schools, 4H, TARC, and USLI to name a few.

Visitors, guests, spectators, and prospective members are always welcome to join us and launch rockets (D motors or smaller) with us! Club events are open to the public.

MASA welcomes rocketeers of all ages, interests, and experience levels. Members share their experience to help others hone skills and become better and safer rocketeers. Flying in a club environment multiplies the fun of rocketry and provides encouragement and support through the camaraderie of fellow members.

You do not need to belong to the NAR (National Association of Rocketry) in order to join MASA. However, we do encourage you to consider NAR membership benefits. Find out more about the NAR at www.nar.org

You can find the club's launch calendar and much more information on the MASA web site (below), or email us at masarocketry@rocketmail.com
