

BAY RUNNER PIPELINE

Frequently Asked Questions

Q: What counties will the pipeline cross?

The Bay Runner project route will include Nueces, Kleberg, Kenedy, Willacy, and Cameron counties.

Q: What product is the pipeline transporting?

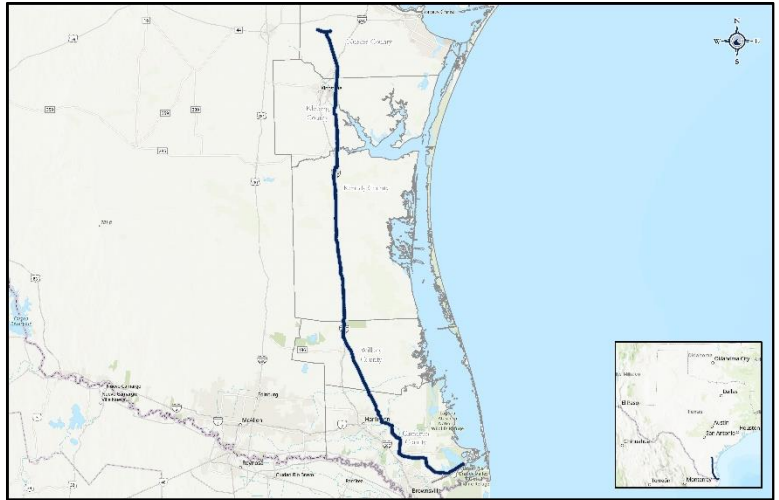

The pipeline is designed to transport up to 2.64 billion cubic feet per day of natural gas from the Agua Dulce, Texas supply area to a terminus near Port Isabel, Texas.

Q: Where is the natural gas coming from?

The Bay Runner Pipeline will transport natural gas from multiple upstream supply pipelines in the Agua Dulce area.

Q: Will the Bay Runner Pipeline cross my property?

If you have not been contacted by a representative of Bay Runner Pipeline, the pipeline is not currently planned to go through your property. To those landowners contacted, we are committed to being good neighbors and look forward to working together, considering your feedback in the proposed route and the project's overall design.

Q: What will Bay Runner Pipeline do to minimize impact on my land?

We follow best management practices during construction to minimize erosion and sedimentation. We also return the area of impacts to preexisting contours, ensure vegetation is reestablished, and return the work areas to as close to previous conditions as possible.

Q: How many people will be working on the project?

The Bay Runner Pipeline will employ more than 800 skilled workers during the construction phase of the project and create 10+ permanent jobs in Texas.

Q: What is the diameter of the pipes used?

The pipes used to construct the Bay Runner Pipeline will be 42-inch and 48-inch pipelines.

BAY RUNNER PIPELINE

Q: How far will the pipeline be below ground?

The pipelines will typically be 3 feet below the surface and a minimum of 5 feet under road crossings.

Q: What is the width of the right of way?

As typical with natural gas transmission pipelines, the Bay Runner Pipeline will have a permanent easement of 50 feet, plus approximately 75 feet of additional workspace during the construction phase.

Q: Will the project use eminent domain?

While the project does have the right of eminent domain, it is only used as an absolute last resort. We are committed to being good neighbors and incorporating feedback from all relevant stakeholders in both the proposed route and the project's overall design.

Q: When will construction begin and how long will it last?

Construction is currently expected to begin in 2025 and conclude by 2026, with an in-service date during the second half of 2026.

Q: Will my land be back restored to how it was prior to construction?

Once construction is complete, our teams will work to restore the disturbed area to as near to its original condition as possible in accordance with the easement agreement.

Words such as "anticipated," "expected," "targeted," "projected," "estimated," and similar expressions are intended to identify forward-looking statements. These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties, factors, and risks, many of which are outside the control of the Company, which could cause results to differ materially from those expected by management of the Company.
