

As one of the methods we like to use to share with you your child's learning and experiences at our kindergarten, is through the secure online platform called Seesaw.

This can be accessed at <https://app.seesaw.me/#/login> or on the Seesaw apps (suggested).

The app called **Seesaw Class** is where we post photos and videos of your child's learning.

We aim to use Seesaw in the following ways

- Individual Activities (learning areas) set up with an overview of the learning that is taking place. Photos and videos of your child is placed in this activity over the year, demonstrating their engagement in this activity. Throughout the year the child's learning journey will therefore be visible to both parents and teachers.
- Individual moments that are captured throughout the day.
- Group learning and experiences – captured and posted to the whole group. Will include group times, group time discussions, incursions, excursions etc.

Only yourself will see your child's individual posts, however the whole group will see the group posts. Please ensure you abide by the kindergarten Privacy Policy and not share photos of children with others or on social media.

Please follow these steps to set up Seesaw

- Download Seesaw **Class**
- Choose 'I'm a student'
- Scan the QR code sent to you via email

Once you are in the app you will be able see our Learning Areas (Activities).

If you have any problems logging in, please contact the educators.
