### **The fundraiser is simple and here is how it works:**

Print off as many of the order forms that your organization will need. Note: We provide an ordering form, and you can edit it specific to your program.

Have a meeting and explain the form and what they are selling. Make sure that the customer's information is legible and that they get all the requested info and payment. The kids will oversee delivery, so they need name, address, phone, etc.....

Let the kids know that if they knock on doors and make phone calls that it's easy to sell these products. If they don't get out and sell, then they will not be successful. Once committed to this program you will find out it really takes off in year 2 and 3 because the people really like our products and word spreads.

The average time frame for selling is anywhere from 10 days to 2 weeks. Then, collect all the sheets and total up all the counts per item. Then return / email the total sheets provided. We request a **3-4-week** turnaround time on all the orders. The kids will oversee giving the customer exactly what they ordered. Therefore, it's important that the sheets are legible.

We will deliver all the product to your school / location at an agreed upon date and time. Orders under \$1500 dollars a delivery fee will be added. When the order is delivered a quantity count will be taken, signed for and it becomes your responsibility. This is when payment is due. From there you can setup a time for each kid to come and grab their orders. It's important that the kids deliver everything ASAP and keep the items cold!
