FOR IMMEDIATE RELEASE

Auris BioEnergy Joins European Commission's Renewable and Low-Carbon Fuels Value Chain Industrial Alliance, Empowering Sustainable Transportation

CAMBRIDGE, Massachusetts, United States, September 21, 2023 — Auris BioEnergy Inc. is pleased to announce its membership in the Renewable and Low-Carbon Fuels Value Chain Industrial (RLCF) Alliance of the European Commission, a significant step towards enhancing the production and supply of renewable and low-carbon fuels. The European Commission Directorate-General for Mobility and Transport warmly welcomed Auris BioEnergy as a member, recognizing the company's commitment to advancing sustainable fuels.

RLCF Alliance is a groundbreaking initiative aimed at accelerating the production and supply of renewable and low-carbon fuels within the aviation and waterborne transport sectors. This initiative aligns closely with the FuelEU Maritime and RefuelEU Aviation initiatives, focusing on ensuring a sustainable future for air and maritime transport while considering the integration of these fuels into road transport. The Alliance offers a platform for businesses and organizations to collaborate, fostering partnerships and facilitating new projects within the renewable fuels value chain.

This milestone underscores Auris BioEnergy's commitment to advancing the production and supply of renewable and low-carbon fuels from dedicated non-edible energy crops produced through sustainable agriculture practices.

Irshad Ahmed, President & CEO of Auris BioEnergy, expressed enthusiasm about this collaboration, stating, "We are honored to join the Renewable and Low-Carbon Fuels Value Chain Industrial Alliance. Our mission at Auris BioEnergy has always been to drive innovation in renewable energy solutions, and this partnership aligns perfectly with our commitment to sustainable transportation. We look forward to collaborating with fellow members and contributing our expertise to the Alliance's efforts in making renewable fuels more accessible and affordable for the aviation and waterborne sectors."

Henrik Hololei, Director-General for Mobility and Transport at the European Commission, also shared his perspective on Auris BioEnergy's membership, saying, "The Alliance welcomes Auris BioEnergy as a valuable addition. Their dedication to renewable energy solutions and sustainable transportation aligns with the Alliance's goals. Together, we can work towards a greener future for the aviation and waterborne transport sectors. He further added, "the Alliance's primary goal is to ensure that the aviation and maritime industries have ample access to sustainable fuels, with a vision of achieving a 90% reduction in the transport sector's greenhouse gas emissions by 2050."

The Alliance has already made significant progress with the endorsement of its first Work Plan, which includes four Thematic Roundtables focused on feedstock, aviation, waterborne transport, and access to funding and financing. Auris BioEnergy will actively participate with other Alliance members in shaping these initiatives.

About Auris BioEnergy Inc.

Auris BioEnergy Inc. (an Auris-Avalon Group of Companies developed at the Sloan School of Management at the Massachusetts Institute of Technology) is a pioneering company in the

renewable fuels sector, dedicated to developing sustainable and low-carbon energy solutions for a cleaner planet. With a focus on innovation, research, and net-zero responsibility, Auris BioEnergy is committed to shaping a more environmentally friendly future for the transportation industry--with current Integrated Biorefinery projects under development on four continents. About European Commission RLCF Alliance

The Renewable and Low-Carbon Fuels Value Chain Industrial Alliance is one of the European Commission's initiatives that focuses on boosting production and supply of renewable and low-carbon fuels in the aviation and waterborne sectors. It is a key flanking measure to the FuelEU Maritime and RefuelEU Aviation Fuels initiatives. The Alliance is a voluntary collaboration of stakeholders from across the transport fuels and other relevant value chains, from sourcing to end-users, as well as technology and finance providers for each step in the value chain. They represent both the fuels supply and demand sides from liquid transportation fuels markets, as well as civil society organization, governments, and their agencies, both in and out of the European Union. For inquiries related to Auris BioEnergy's participation in the alliance, please contact the Alliance Secretariat at RLCFAllianceSecretariat@fuelseurope.eu.

For further information about the policy context of this alliance, please contact the Commission RLCF Alliance Team at move-rlcf-alliance-team@ec.europa.eu.
