

CPAP Masks (Not what you think!)

THE BREATH FACTORY
YOUR SNORING AND APNEA SOLUTIONS

CPAP masks have changed dramatically over the years. Today's designs are lighter, quieter, and more comfortable than the masks many clinicians remember. With improved materials and thoughtful design, modern masks are built to help patients adapt to therapy and use CPAP successfully.

F&P Nova Micro Mask - Ultra minimal nasal pillow

This is one of the smallest CPAP masks available. Minimizes facial contact and provides a stable seal, making it a comfortable option for patients who want the least intrusive mask possible.

ResMed AirTouch N30i - Soft profile nasal mask

The **AirTouch N30** features an under-the-nose cradle cushion that delivers airflow without covering the nasal bridge. Its soft, flexible design provides a comfortable seal while reducing pressure points and facial marks.

ResMed AirFit P10 - Lightweight nasal pillow

The **AirFit P10** is one of the most widely used nasal pillow masks worldwide. Known for its quiet vent design and lightweight design, it provides effective therapy with minimal facial contact.

F&P Evora Full Face Mask

The **Evora Full Face mask** provides full face coverage in a compact, comfortable design. Its under-the-nose cushion allows patients to breathe through both the nose and mouth while minimizing pressure on the nasal bridge. Great for mouth breathers.

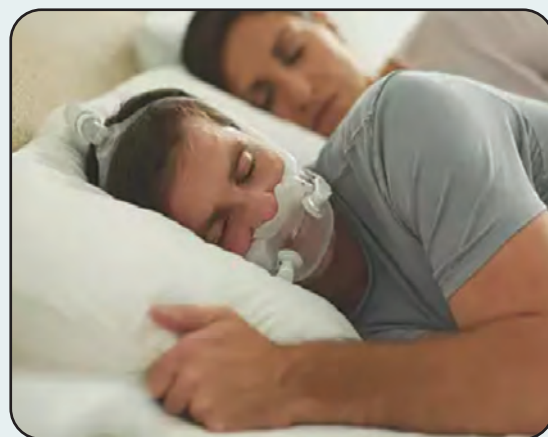

ResMed AirFit F30i

The **AirFit F30i** is a compact full face mask that delivers airflow under the nose while covering the mouth. Its top-of-the-head hose connection keeps tubing out of the way, allowing patients to move freely and sleep comfortably in multiple positions.

Philips DreamWear Full Face

The **DreamWear Full Face mask** delivers airflow under the nose while covering the mouth, allowing patients to breathe comfortably through both the nose and mouth during sleep. Its top-of-the-head hose connection keeps tubing out of the way, helping patients move naturally throughout the night.

The **Breath Factory** carries a wide variety of masks for every patient preference. A well chosen mask will lead to better CPAP compliance and better health outcomes.

Let us help you. This is where we shine.
