## **SAFETY YELLOW #952 ROOFING GRANULE**

Natural Select® #952 Safety Yellow Roofing Granule is a premium resin-coated roofing granule engineered to create highly visible rooftop walkways, designated access paths, warning zones, and maintenance areas on commercial low-slope roofing systems. Its bright safety yellow color provides excellent visual contrast, helping contractors and facility personnel clearly identify travel routes while maintaining a professional appearance.

Packaged in convenient 50 lb buckets, SchabelTech's safety yellow roofing granule is easy to apply during roof installation, repair, or maintenance. The durable resin coating, minimal dust generation, and consistent 16/30 gradation provide clean application characteristics and long-lasting color retention in demanding outdoor environments. Whether used on new construction or retrofit projects, Natural Select #952 delivers an economical, professional solution for rooftop traffic designation.
