This Spring we're hosting a new event – a Women's luncheon, and our event this year is called the Women's Spring Soiree (swah-Ray).

The date for the Spring Soiree is Sunday, May 19 starting at 11:30 a.m. in Fellowship Hall.

We'll be serving lunch and doing a hands-on craft activity that you can take home. The craft will be something that women of all ages can do and enjoy.

Tickets for the event are \$20 dollars and includes the cost of lunch and the craft, and will go on sale after worship services beginning in April.

The same team that planned the Women's Christmas Tea is planning this event. We are looking for additional volunteers. If you're interested, you can contact Sherry Sinnen at 262-358-2307 or at [sherrysinnen@gmail.com](mailto:sherrysinnen@gmail.com).

Greeting, Siblings in Christ!

As I sit here and write this month's newsletter article, I am struck by how quickly things can change. Yesterday, we hit a statewide record high temperature here in Wisconsin of 77 degrees and this morning it is 16 degrees. I am glad that I took the opportunity to ride my motorcycle while it was warm because I would have wanted to ride in to church today on it with it being so cold. There are many that get upset with fluctuations like that but I usually see the opportunity in change....not just in the weather but in most aspects of my life.

Easter, too, is a time of change. A time when we celebrate the resurrection of our Lord and how our hearts change when we truly accept Him into our lives. Within those changes in our heart, lies great opportunity.

With that heart change, we can take the opportunity to share Jesus' love with others more boldly. I like to think I am pretty good at this within the confines of our church but where are the opportunities to do that outside of the church. Not just different places and spaces, but also with different faces.

With that heart change, we can look for the opportunity to forgive more freely. There is freedom in forgiveness...for those we extend it to and for ourselves. What grudges am I holding that I need to let go? Where can I forgive as the Lord forgave me?

With that heart change, I can find the opportunity to find peace in a weary world. Let's face it... life can be stressful, people can be mean, and sometimes things just don't seem fair when they get thrown at us. Even so, I can find peace in the knowledge that all of this is temporal and that my destiny is secure through Christ's resurrection.

The fact is, that with the change of heart that comes from letting Jesus in, opportunities abound. The opportunity to care more, serve more, give more, show more kindness....what opportunities do you see?

My prayer for all of us as we reflect on the change of heart that comes with being a Christian is that we all seize the opportunities to be more like Jesus.

Peace,

Pastor Chip

Dear friends,

The March winds are blowing in, and the National monthly health observance is highlighting information about diabetes mellitus. Diabetes is a disease that affects how the body uses blood sugar (glucose). Glucose is a very important source of energy for the cells that make up the muscles and tissues. Glucose is also the brain's main supply of fuel.

The primary cause of diabetes varies by type. No matter what type of diabetes you have, it can lead to extra sugar in the blood. Excessive sugar in the blood can lead to serious health problems. Chronic diabetes conditions contain type 1 diabetes and type 2 diabetes. Feasibly reversible diabetes conditions include prediabetes and gestational diabetes. Prediabetes happens when blood sugar levels are higher than normal. But the blood sugar levels aren't high enough to be called diabetes. Prediabetes can lead to diabetes if steps are taken to prevent it. Gestational diabetes occurs during pregnancy. It may go away after the baby is born.

Type 1 diabetes can start at any age. But it often starts during childhood or teen years. There is insulin injections involved in controlling blood sugar. Type 2 diabetes, the common type, can develop at any age. It is more common in people older than 40 but type 2 diabetes in children is increasing.

A person's diabetic symptoms depend on how high their blood sugar is. Some people, especially if they have prediabetes, gestational diabetes, or type 2 diabetes, may not have symptoms. In type 1 diabetes, symptoms tend to come on abruptly and be more severe.

Some of the symptoms of type 1 diabetes and type 2 diabetes are: Feeling more thirsty than usual, urinating often, losing weight without trying, presence of ketones in the urine. Ketones are a byproduct of the breakdown of muscle and fat that happens when there is not enough available insulin. Feeling tired and weak. Feeling irritable or having other mood changes. Having blurry vision. Slow healing sores and cuts. Getting a lot of infections, such as gum, skin, and vaginal infections.

There are various treatment plans for diabetes but an important part of managing diabetes is keeping a healthy weight through a healthy diet and exercise plan. Focusing on more fruits, vegetables, lean proteins, and whole grains is important. Cutting down on saturated fats, refined carbohydrates and sweets can be helpful. Sugary foods are ok occasionally, but they must be counted as part of your meal.

Everyone needs regular aerobic activity. Physical activity lowers your blood sugar level by moving sugar into your cells, where it's used for energy. Physical activity also makes your body more sensitive to insulin. That means your body needs less insulin to transport sugar to your cells.

Taking charge of a diagnosis can often mean finding meaning and purpose in it. Getting involved in organizations that support people with diabetes allows you to work towards the same cause. It increases your power and allows you to gain the courage to face your fears. You can do it!

Shalom,

Sue Quever R.N., F.C.N.
