

Structural Firefighting Nozzle

Presenting WATERSHIELD, the new Structural firefighting nozzle Brand from the industry's experienced manufacturer of wildland firefighting nozzles, ball valves, wye valves and many waterflow products. S&H Products of Arvada, Colorado, has been making these specialized firefighting products for the US Forest Service, wildland, urban interface and structural firefighting requirements, for over 35 years.

The SG30-150 nozzle is equipped with spinning turbine shaped teeth, it provides precision water delivery with (5) selectable gallonage settings – 30, 60, 95, 125 and 150 GPM. With just a quarter turn of the bumper adjustment, the water pattern can be changed from a straight stream to a 110-degree wide fog pattern.

NFPA-compliant for structural firefighting and backed by a 5-year warranty, count on Watershield to help your department save lives and protect property.
