FoodCODE Systems Inc. Presents a Food Delivery and Smart-QR Code System

A start-up project is to provide a food delivery application that allows customers to gather all the product information by quickly scanning the Smart-QR Code.

VANCOUVER, British Columbia - **Jan. 11, 2022** - *PRLog* -- Increased foodborne illnesses are becoming extremely alarming due to contamination and missed expiration dates. Now customers require the entire lifestyle experience, and it is necessary to find ways to over-serve them. Previously brands attempted to achieve this by improving packaging design. Still, it does not solve the core issue of real-time food labelling and shelf life. Now is time to introduce a new strategy and additional care into the food and beverage industries.

FoodCODE Systems Inc. provides food safety checks and balances and ensures that customers consume freshly made and nutritionally well-balanced food. The team is developing a proprietary cloud-based application that uses data integrated intelligent Smart-QR Codes. The combination of scanning software and physical labels can be a reliable tool that gives customers healthier food choices and keeps them aware of the nutritional value of the purchased products. The start-up is integrating the FoodCODE Smart-QR Code solution into meal delivery packaging, enabling customers to track nutritional information more simply by scanning Smart-QR codes with their smartphones.

About FoodCODE Systems Inc.: FoodCODE is a cloud-based application that uses data-integrated intelligent Smart-QR Codes, giving customers a tool to make healthier food choices and keep them aware of the products they are purchasing. (https://foodcode.club/)
