FoodCODE Systems Inc. Keeps their Clients Safe This Summer

Having a lunch break in the park during the summer shouldn't result in taking a trip to an ER. A startup brings awareness of food poisoning during the summertime and talks about ways to avoid it.

VANCOUVER, British Columbia - **June 16, 2022** - *PRLog* -- With summer weather around the corner, more people spend time together on a picnic or choose a take-out instead of having a proper sit-down meal in a restaurant or a café. The summer heat is one of the primary reasons why there is an uptick in food poisoning cases during these months. However, it shouldn't stop people from enjoying their favourite meal in the sunshine, especially here in Vancouver, where the sun can be a rare guest.

FoodCODE's founders are energetic and creative entrepreneurs with strong problem-solving skills and a love for cooking who bring their expertise to educate consumers on the importance of food safety. A few simple rules will help people enjoy the summer to its fullest. It is recommended not to keep food out or at room temperature for more than one hour. A cooler filled with ice packs can store the food on the go and help it stay fresh longer. Washing hands and following proper cleaning techniques while handling food can help people avoid cross-contamination. FoodCODE continues to develop its product to meet the changing needs of its clients. The startup management sees food as a vital nutritional source and feels its creation will change how the food is viewed—enabling customers to track nutritional information using a Smart-QR Code. Unlike a standard QR Code, the Smart-QR Code allows real-time creation, changes and updates to content connected to a single Smart-QR Code. It is a technology that makes it possible to monitor the product's shelf life, production date, and recommended consumption time to ensure freshness and quality. FoodCODE Systems Inc. values its customers' health and constantly looks for ways to improve its operation to ensure its customers stay safe and healthy.

About FoodCODE Systems Inc.: FoodCODE is a cloud-based application that uses data-integrated intelligent Smart-QR Codes, giving customers a tool to make healthier food choices and keep them aware of the products they are purchasing. (https://foodcode.club/)
