

FINALLY!

***THE FIRST AFFORDABLE, FULL FEATURED PLM
SYSTEM IN THE HISTORY OF PLM***

**Does Your Engineering Department Need Document Management?
The Answer Might Surprise You!**

1. How many supporting documents do you have associated with Product/BOMs
2. When these documents change, do you Rev the parent BOM part or CAD part
3. What happens when you change a material specification that is used in many BOMs
4. Do you associate Assembly Specifications with Product Structure
5. Can you do a "Where Used" on any of the supporting documents
6. How many spreadsheets do you have...how many of these control BOMs
7. Are these documents stored on personal drives
8. Pictures and technical manuals are in Rev step with BOM
9. This is a short list of why it makes sense to have integrated Document Management
