Skills Assessment Supplement

Focus on Language Arts Standards

Preface

The *Skills Assessment Supplement: Focus on Language Arts Standards* has been developed to help teachers monitor student progress toward mastery of grade-level standards. Three forms (Forms A, B, and C) are available to Reading First school districts (www.calread.net). These forms may be used in any order and independently of each other, as each form provides different questions to test the same standards to assess student achievement.

Formal directions for the administration of the *Skills Assessment Supplement* have intentionally not been included, to allow flexibility in the use of the supplements for assessment and instruction. Time limits have not been suggested for any section. Individual districts or schools may develop their own administration guidelines. However, it is recommended that students independently read the directions and answer the questions prior to receiving teacher support. Additional instruction and practice should be provided for students who are unable to independently read and follow directions or have not mastered specific content standards.

Read the passage and the timeline. Then read each question. Use the passage and timeline to answer questions 1, 2, and 3.

The Roanoke settlers were not able to establish an English colony. But the fertile land of North America soon made other settlers willing to try. The Jamestown colony was paid for by 100 rich investors who formed the Virginia Company. Another new English colony was more successful than Jamestown. George Calvert, later called Lord Baltimore, was given land by King Charles I of England. Calvert started a colony where Catholics could worship freely. Other English colonists tried to take over islands in the Caribbean Sea. Their first efforts, on the islands of St. Lucia and Grenada, failed because the Indians who lived on the islands forced the English to leave. On Barbados, however, the English were able to set up plantations for growing tobacco and sugar cane. The English made many attempts at colonization and eventually many colonies grew and prospered.

Read the passage. Then read each question and mark the correct answer.

HOW TO MAKE A COMPASS

1. Find an empty food can and remove the bottom lid with a can opener. Cut a strip of metal from the can with a large, old pair of scissors. To make the strip magnetic, rub it with a soft piece of cloth 20 times in the same direction. Then using a blunt nail, make a dent in the center of the strip. Do not make a hole.

2. Bend the strip where you made the dent. Then make two other bends at equal distances from the center, so the strip will look like this:

3. Take a cork and push a needle or pin through the cork's center.

4. Place the dent of the bent strip on the point of the needle or pin. If the strip does not balance on the point, cut off small pieces of the ends of the strip until it balances. Your compass will now look like this:

5. Use a spot of paint to mark the end of the strip that points north. You can then check your compass by placing another compass next to it.

4. In step #4, you are told that the strip should be _____.

5. What must you do in step #2?

Antarctica, the southernmost continent, was discovered between 1819 and 1821. Who first discovered it is unknown; three countries claimed the honor – England, the United States, and Russia.

England reported that William Scott saw some islands on the northern coast of Antarctica in 1819. The United States claimed that, while seal hunting in Antarctic waters in 1821, Nathaniel Palmer discovered a peninsula that would later bear his name. The Russians maintained that Fabian von Bellingshausen deserved the credit. In 1821, he sighted a strip of coastline which turned out to be a large island.

A meeting between Palmer and Bellingshausen is one of the most famous in Antarctic history. In 1821, fog forced Palmer to drop anchor while hunting near Antarctica. The next day when the fog lifted, Palmer’s ship rested between two Russian ships that Bellingshausen commanded. Both men were quite surprised at their chance meeting.

In 1898, two separate teams explored Antarctica. These teams were the first to investigate the mainland and the first to survive a winter on the icy continent. A Norwegian team wintered in Cape Adare. A Belgian ship was stranded off the tip of the Palmer Peninsula for 11 months. Despite the freezing temperatures, food shortages, and disease, both crews lived to tell of their ordeal.

10. What is the main idea of this passage?

- C. Extreme cold makes exploration difficult.
- D. Freezing temperatures are easy to withstand for long periods of time.

Expository Critique

2.5 Distinguish facts, supported inferences, and opinions in text.

Read the passage. Then read each question and mark the correct answer.

Two hundred years ago, the idea of keeping food fresh by putting it in cans was invented. Before cans, some people had to shop almost every day to purchase fresh food. This was not a problem for most people because they grew their own food or lived near a market. Keeping food fresh was, however, a problem for armies. Armies had to feed many men, and the cooks were not near markets to buy fresh food. Many times the food would spoil before it could be cooked and eaten.

In 1795 a chef in Paris, Nicolas Appert, invented a glass jar with a lid that could be sealed. Food that was cooked and stored in these glass jars would last for weeks without spoiling. Around 1810, tin-coated metal was invented in England. It became the most important invention of the 1800s. Cans made of metal were not as expensive as glass jars and were easier to transport. Food stored in these cans stayed just as fresh as food in glass jars. This is how the term “canning food” began.

13. What problem made people think about keeping food fresh?

- A. Glass jars were expensive and breakable.
- B. Armies needed to keep fresh food from spoiling.
- C. Many people stopped growing their own food.
- D. Army cooks moved away from markets.

14. Which of the following statements is an opinion?

- A. Cans made of metal were not as expensive as glass jars.
- B. Many times food would spoil before it could be cooked and eaten.
- C. Tin-coated metal became the most important invention of the 1800s.
- D. Before cans, people had to shop almost every day to have fresh food.

15. Which of the following statements is NOT supported by the passage?

- A. Nicolas Appert’s invention changed people’s lives.
- B. Food stored in glass tastes better than food in cans.
- C. Canned foods prevented soldiers from starving.
- D. Three hundred years ago, people did not know how to can food.

16. How did the invention of tin-coated metal help with storing food?

- A. It made the invention of the can possible.
- B. Tin-coated metal was more expensive than glass.
- C. Food stored in metal cans would last longer than food stored in glass jars.
- D. Tin-coated metal was easier to make than glass.
