ALL ABOUT THE CHILDREN

Little Dreamers Daycare Academy – was envisioned 15 years ago to provide our community in North Baltimore County with a state-of-the art facility for our children. Our mission was to foster a nurturing environment where every child is empowered to reach their full potential. Guided by our core values of excellence, integrity, and compassion, we were committed to providing a dynamic STEM-focused curriculum that ignites curiosity, sparks innovation, and cultivates a lifelong love for learning. We believe that every child is a unique individual with unlimited potential, and it is our privilege to accompany them on their journey of discovery and self-discovery.

Our perseverance was rewarded with a million-dollar grant from the State of Maryland and Baltimore County. We want to express our gratitude to Baltimore County and the State of Maryland for taking us this far on our journey that we began so long ago. We want to thank Dr. Kenneth Robinson our visionary, our leader that encouraged this dream and held steadfast through many ups and downs with his commitment to get it done. We also would like to acknowledge and give thanks for all of those who donated man hours assisting us in the development from the ground up including-

Strayer Contracting, our general contractor, NW2 Engineers, SLRE Consulting, The McClearn Group, DLWC & Impact Baltimore-EDC Boards as well as all of the endless hours provided by DLWC administrative staff and it's volunteers for their key roles and seamless delivery of our project. We could not be here without all of you and your tireless efforts and support.

We now find ourselves in the homestretch to reach our final goal and open Little Dreamers Daycare Academy This Fall 2025. Our last piece is to complete the Playground, an essential and necessary part to open outdoors for our children. This "All About the Children" event is calling on you to help us reach our destination. Your sponsorship, donations in kind, VIP presence and ticket sales will take us across the finish line. We appreciate ANY assistance you are able to provide for our children and their future.

From the Beginning

Think. Reason. Question. Experiment. These are just a few of the skills and qualities that children will develop at Little Dreamers Daycare Academy. Since our founding, we've focused on supporting kids during all transitions throughout childhood.

All activities are designed to adequately nurture the emotional and intellectual growth of our kids. Through stimulating situations and hands-on learning opportunities, young children are free to develop into bright young minds.

Think & Reason

When children think and reason, they are actively processing information, making connections between ideas, analyzing situations, and forming conclusions, which allows them to understand the world around them, solve problems, make decisions, and develop their own perspectives, gradually progressing from concrete thinking to more abstract reasoning as they mature.

Question

When children ask questions, they are actively engaging in their own learning process, seeking information to understand the world around them, developing critical thinking skills, and demonstrating a desire to build connections with those they trust by seeking answers from them; essentially, questioning is a natural way for children to explore and make sense of their environment and acquire knowledge.

Experiment

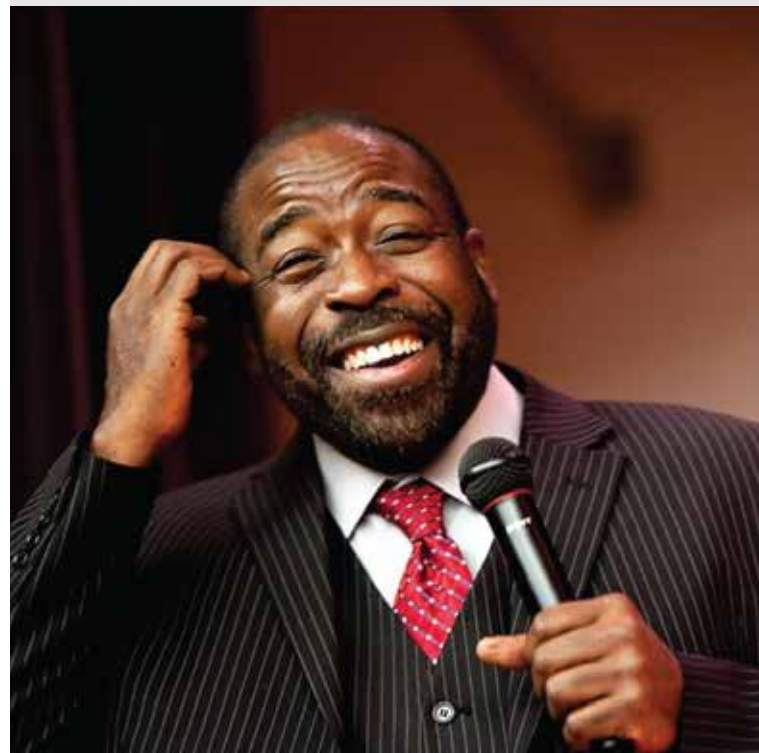

When children experiment, they actively explore their environment by testing ideas, manipulating objects, and observing the results, which fosters their curiosity, critical thinking skills, problem-solving abilities, and understanding of how things work, while also promoting creativity and a natural desire to learn about the world around them; essentially, it helps them develop a deeper understanding through hands-on exploration.

LES BROWN

***“You have greatness
within you.”***

As one of the world’s most renowned motivational speakers, Les Brown is a dynamic personality and highly-sought-after resource in business and professional circles for Fortune 500 CEOs, small business owners, non-profit and community leaders from all sectors of society looking to expand opportunity. For three decades he has not only studied the science of achievement, he’s mastered it by interviewing hundreds of successful business leaders and collaborating with them in the boardroom translating theory into bottom-line results for his clients.
