

1 YEAR WARRANTY

Maple Mill Cabinetry will, at its option, repair or replace without charge any product we sell where our inspection reveals a defect in workmanship or materials for a period of one year after original installation. Maple Mill Cabinetry is not responsible for labor costs regarding removal, return or reinstallation and is not responsible for other materials used in the installation. To obtain performance under this warranty contact Maple Mill Customer Service at 262-346-6455.

Implied warranties including that of merchantability are expressly limited in duration to the duration of this warranty. Maple Mill Cabinetry disclaims any responsibility for consequential damages. Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so this limitation and exclusion may not apply to you. This warranty gives you specific legal rights. You may have other rights that vary from state to state.

CARE AND CLEANING

Wood Exteriors

Color and grain variations are natural characteristics in authentic wood surfaces. Since no two trees are exactly alike, these variations are evident in every piece of real wood. Natural variations are blended somewhat by the application of toners and stains. These finish applications are not designed to eliminate, but to enhance the charm and unique characteristics of the natural wood. The following care suggestions will ensure the longest possible service and beauty of the high-quality finish applied by Kitchen Cubes to your cabinets.

After Installation

Use clean, soft cloths only when cleaning your cabinets. Clean all surfaces with a damp cloth, drying immediately with a dry cloth.

Cleaning

Wipe the cabinet surfaces with a clean, damp cloth and then dry with a clean cloth. Mild soap and water applied with a clean cloth can be used to remove oil, grease or other material from the surface. All soap residues should be rinsed from the surface using a clean, damp cloth. Oils, grease and other soils that do not respond to water can be removed with a solution of mild soap and water. The surface should be rinsed immediately with a clean, damp cloth and dried thoroughly.

Scratches and Nicks

These can be eliminated or hidden by using a touch-up color marker on shallow scratches, or by using a matching wood-tone putty stick on deeper scratches or nicks. These areas can then be blended with surrounding areas using a light coat of wax.

Things to Avoid

Do not use detergents, strong soap, abrasive cleaners or self-polishing waxes which can also be harmful to the finish. Keep the finished surfaces dry. Dampness next to dishwashers, sinks and toe kick areas can cause finish damage and later damage to the underlying wood if not dried as it occurs.

Interior Surfaces

The standard interior on Maple Mill cabinets is a non-absorbent vinyl surface that resists scuffing, marring and repels most household spills. To clean these surfaces, simply wipe with a damp cloth or sponge and dry thoroughly with a clean, soft cloth.
