

## EZ Smartbox 3.0 advantages

- **Materials, heat resistance**
- **HVAC fan efficiency**
- **Filtering system**
- **Power Supply System**
- **Experience, EZ to use**
- **Capacity**
- **Price**

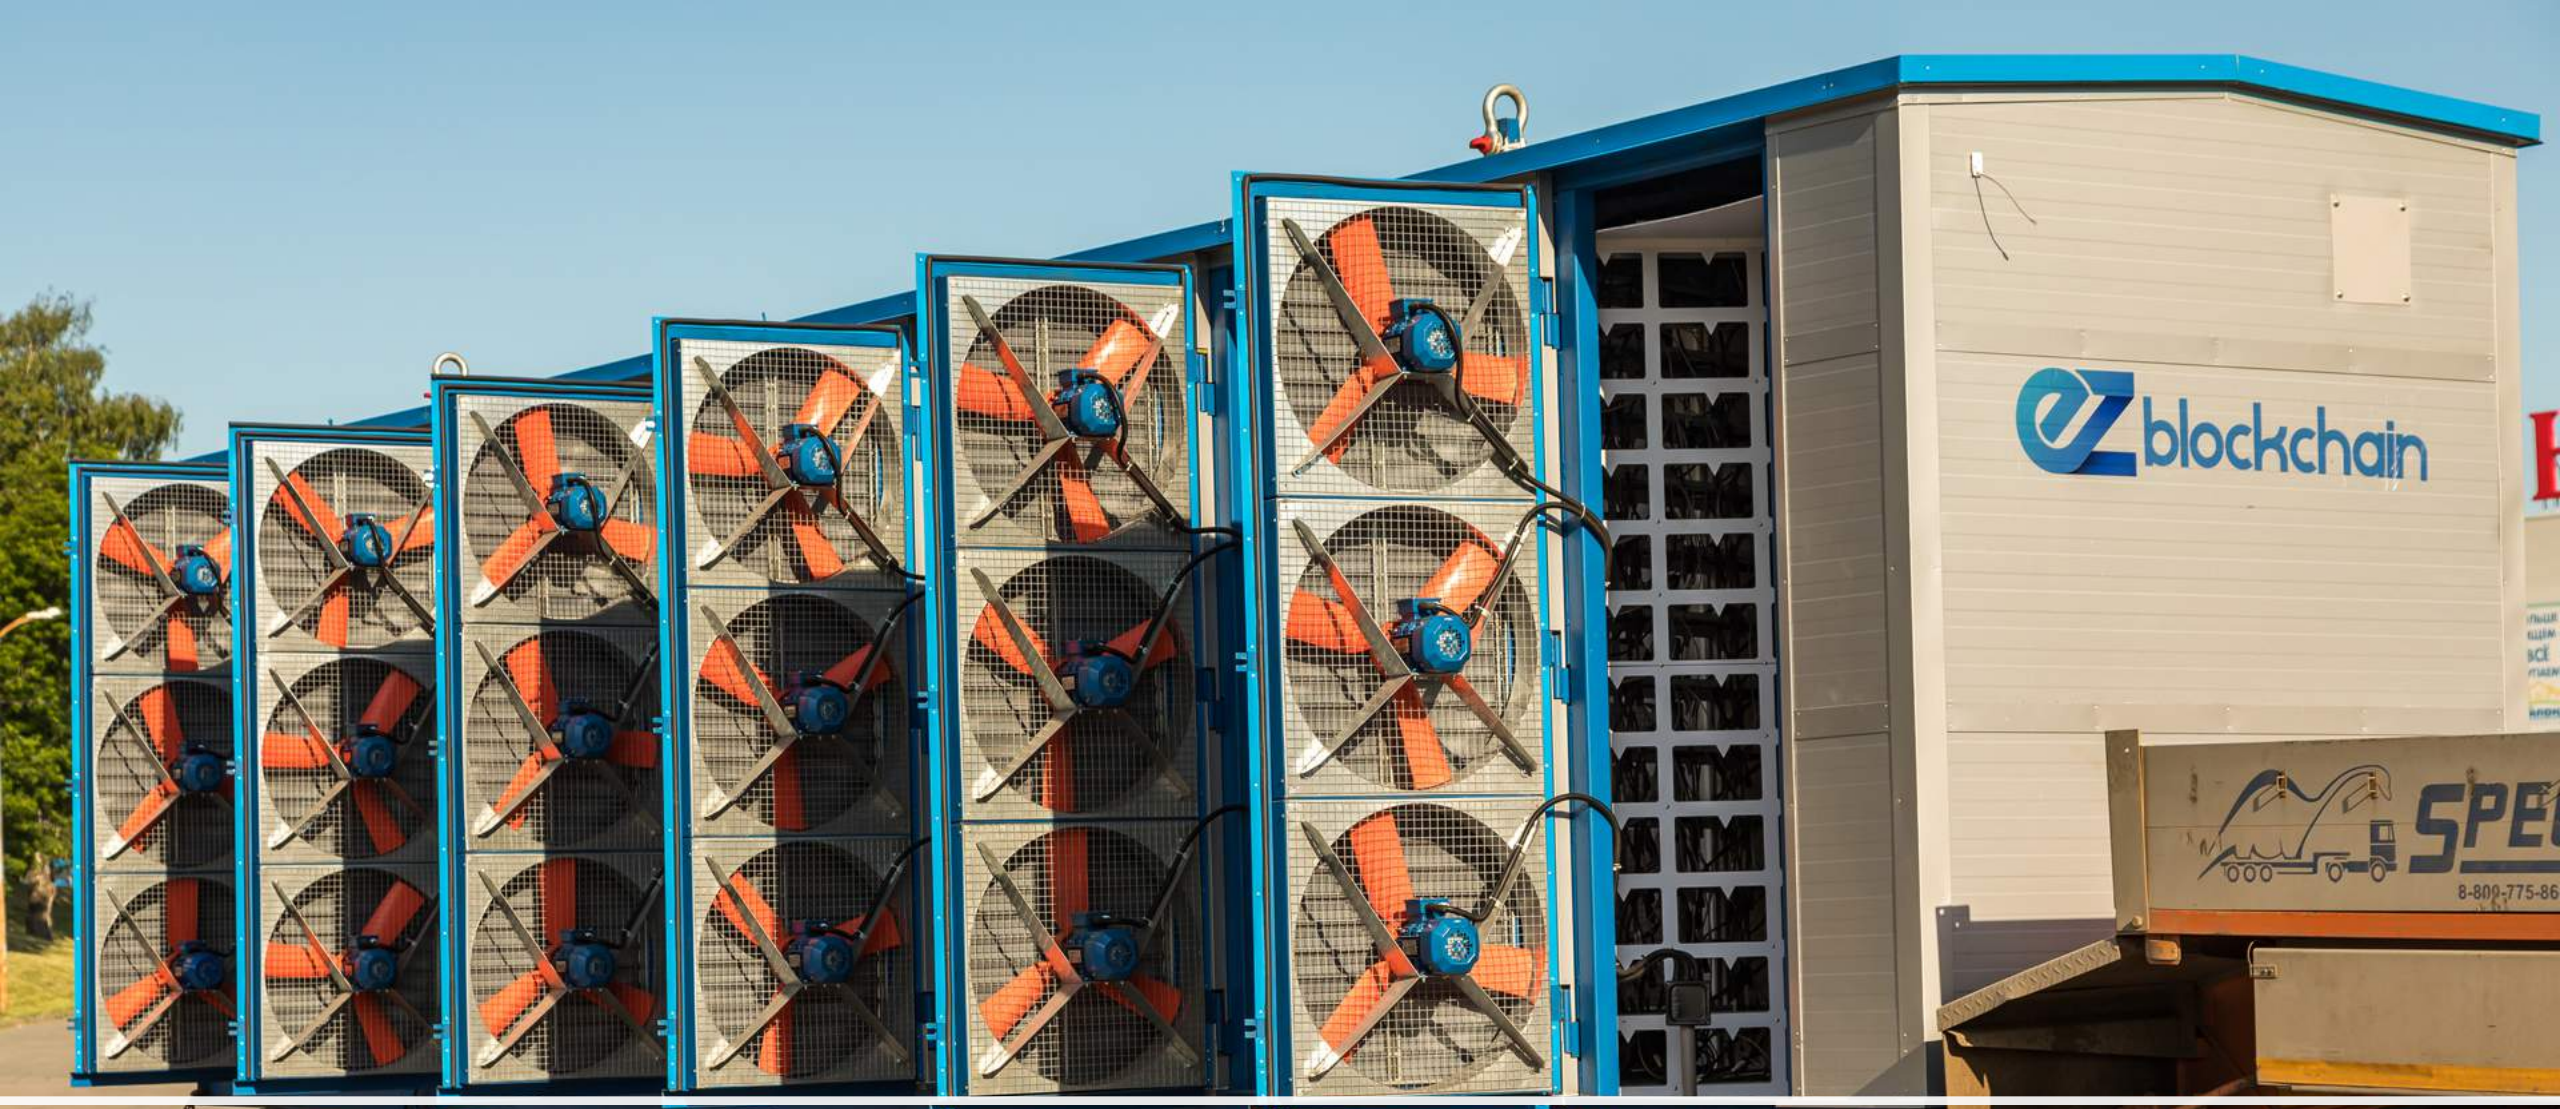

**Materials, heat resistance – the Smartbox is made of sandwich panels**

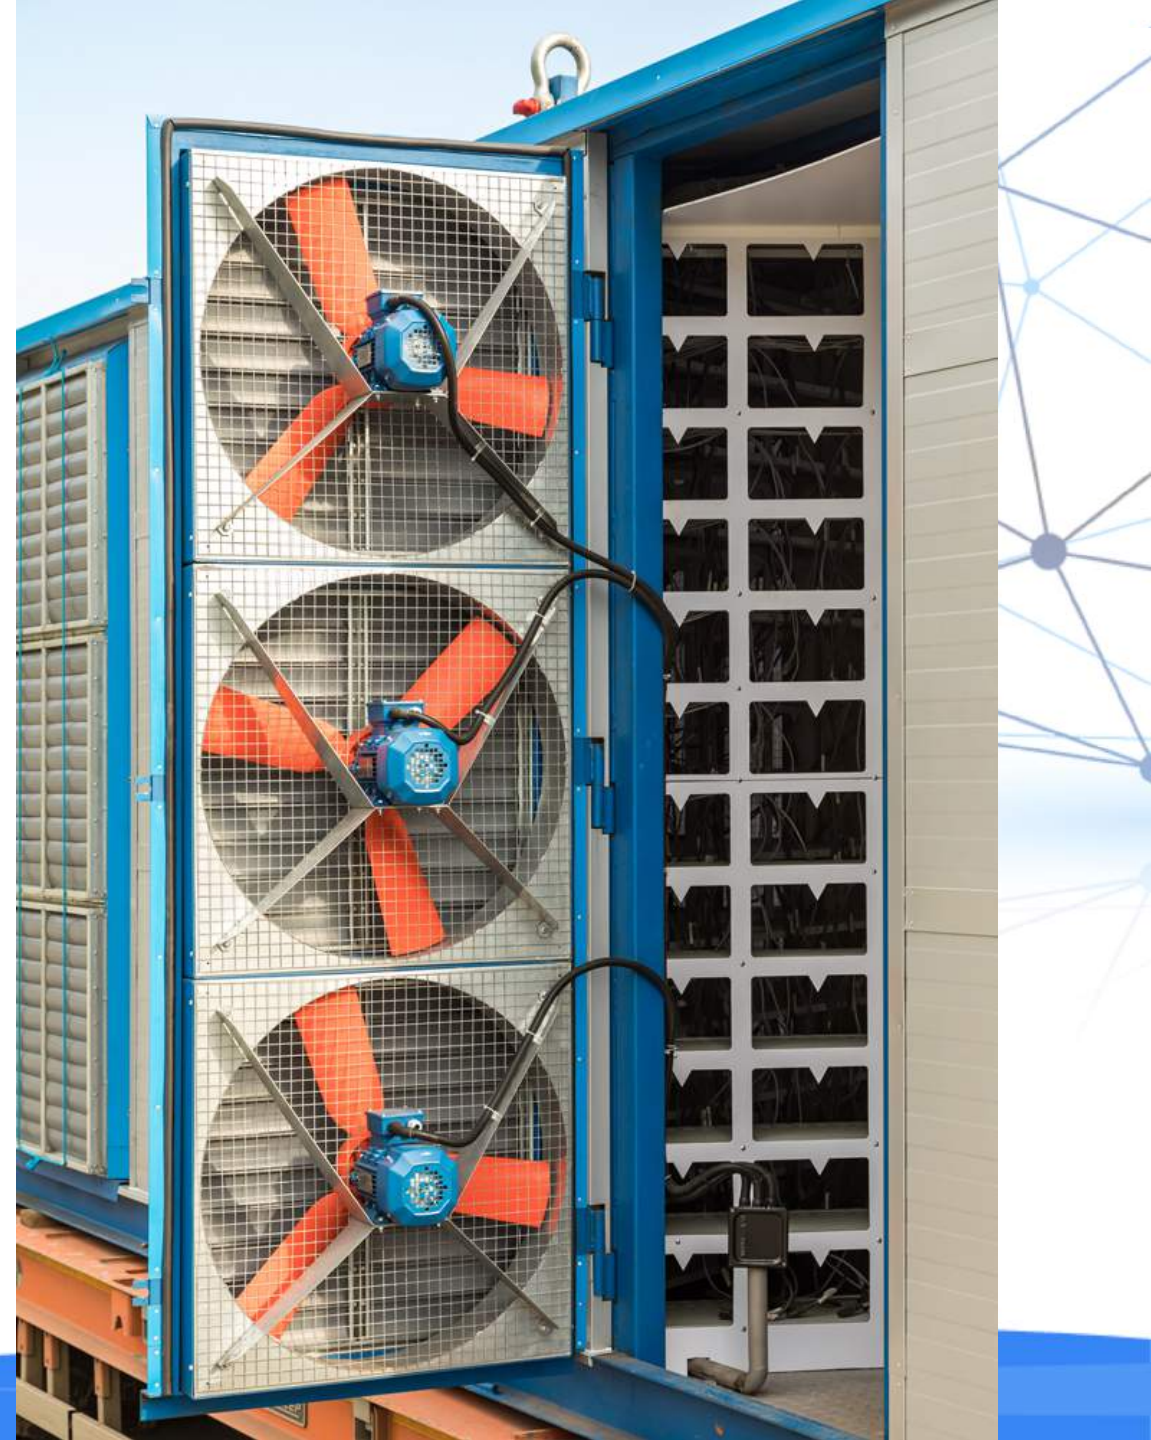

## HVAC efficiency

## Fan door

- Fan door is easily accessible for maintenance
- Each Fan air flow is 13 000 ft<sup>3</sup>/minute
- Fan section is operated separately and is connected to frequency regulator
- fan consumption - 1 KW/h
- Fan sound level 64 dB

Handles to take off filter panels

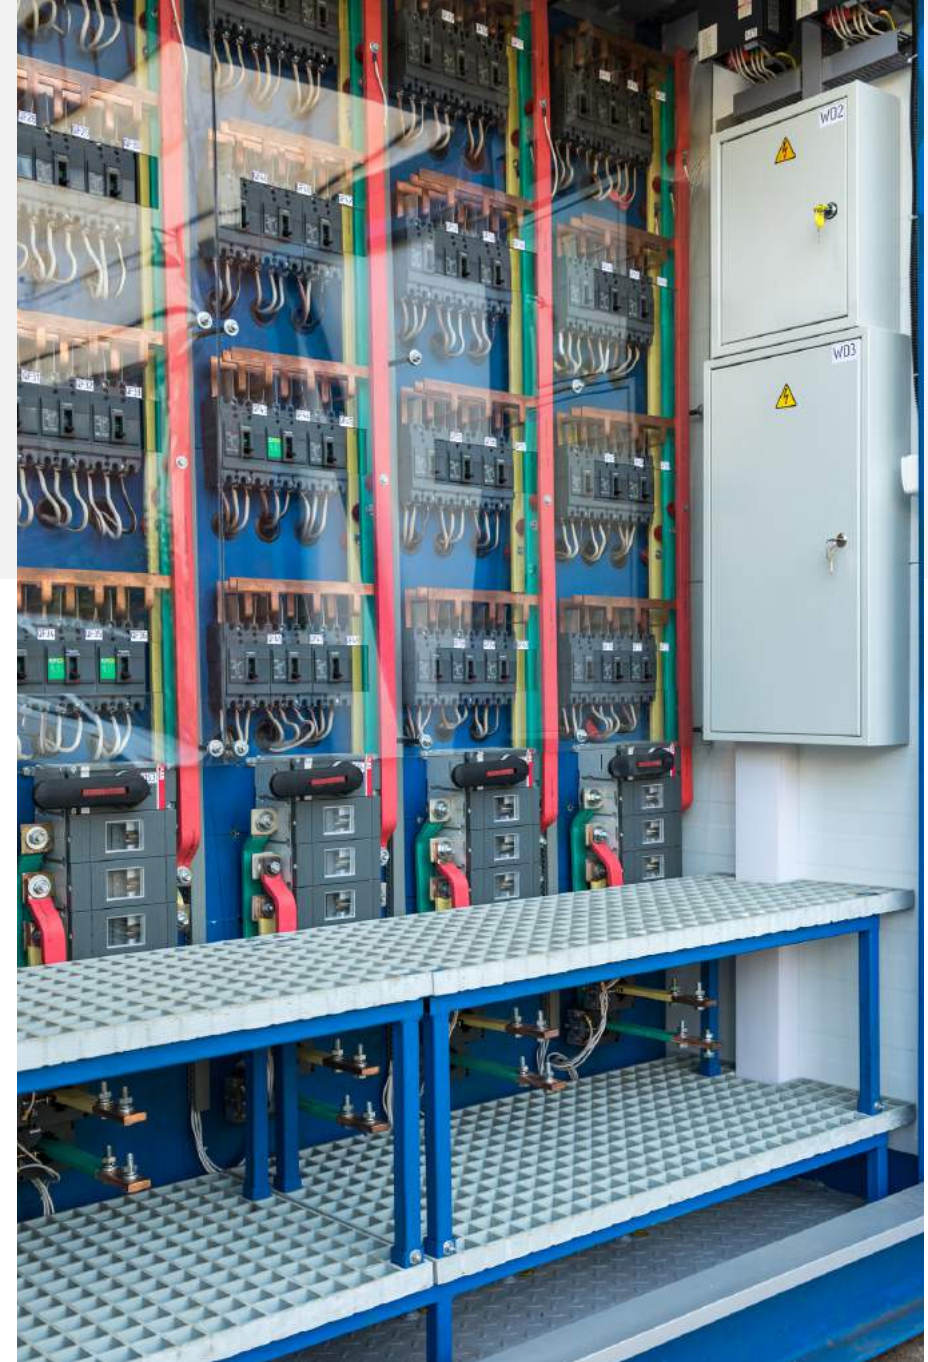

Separate electrical  
room

## Electrical room

Secured & raised platforms provide shock protection from power lines and safe access to main breakers without extra ladders

- Every miner has dedicated Ethernet connection and surge protected power cables.
- Electrical infrastructure is designed to run Antminer S17 S19 type miners
- The floor is covered completely with rubber to protect from electric shock

Capacity – 2500 KW,  
Capable of safely operating 720x  
S17/S19 miners
