NAVAJO AREA INDIAN HEALTH SERVICE COVID-19 VACCINATION SCHEDULE FOR OCTOBER 2022

Window Rock, Arizona --- COVID-19 vaccines for children 6 months through 5 years of age are now available at Navajo Area IHS facilities to protect young children from COVID-19. Parents and families are encouraged to vaccinate their young children as soon as possible.

The CDC recommends that everyone 6 months and older get vaccinated against COVID-19. COVID-19 vaccines are the best defense against severe illness and hospitalization for all age groups.

Both the Moderna and Pfizer-BioNTech COVID-19 vaccines have been approved for children ages 6 months and older.

The Pfizer-BioNTech COVID-19 vaccine for children 6 months through 4 years old will be a three-dose primary series, spaced with 3 weeks between dose 1 and dose 2, then 8 weeks between dose 2 and 3.

The Moderna COVID-19 vaccine for children ages 6 months through 5 years old will be a two dose primary series with doses spaced 1 month apart.

COVID-19 vaccinations are recommended for everyone 6 months and older. When eligible, all individuals ages 5 years and older should receive a booster dose after completing their primary COVID-19 vaccination. Adults ages 50 and older can also now receive a second booster at least two months after your most recent COVID vaccination.

People who are moderately or severely immunocompromised or have weakened immune systems have specific COVID-19 vaccine and booster recommendations. Examples include people receiving active cancer treatment, those who had an organ transplant or stem cell transplant, advanced or untreated HIV infection, those who are taking medicine to suppress the immune system, and others. Visit the CDC website to learn more.

COVID-19 vaccines are safe and effective. Booster doses help strengthen protection against Omicron and other variants. As with vaccines for other diseases, you are best protected against infection with the virus that causes COVID-19 when you stay up to date with your vaccinations. Talk with your health care provider if you have questions about eligibility.

To protect yourself and your loved ones from COVID-19, continue to:

1. Wear a mask – cover your nose and mouth.
2. Wash your hands or use hand sanitizer.
3. Watch your distance (keep 6 feet or more apart).

Protecting yourself will help to protect those around you who may not be able to get vaccinated.

Below are the COVID-19 vaccination schedules for NAIHS service units. The events are subject to change based on weather and other factors. Bring your COVID-19 vaccination card with you.

CHINLE SERVICE UNIT

Chinle Comprehensive Health Care Facility
Pediatric Outpatient Clinic

COVID-19 and FLU vaccines are available at Chinle Outpatient clinics.

Monday through Friday, 8 am to 5 pm;

Closed 12:00 pm – 1:00 pm for lunch
