Helping students
be highly successful
for over 25 years!

3 Top Tips to get a Grade 7+ in GCSE Maths

Welcome to MRW Maths

My name is Mark Williams - I love to work with students who want to fulfil their potential - I believe that you get out of life what you put in! There is nothing better for me to see a student who has been re-energised and enthused in their approach to Mathematics in a matter of months. I have been able to demonstrate this in helping thousands of students over the last 25 years. Enabling students to be successful was a driving force in me becoming a secondary school headteacher in 2018.

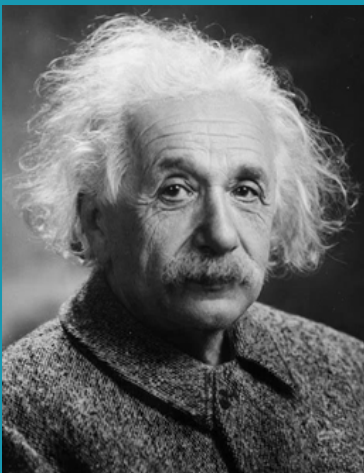

Your child may be towards the lower end of a higher set. It could be there are faster students who are impacting on your child's confidence. It does not mean your child is not a good mathematician. They just need to find their inner confidence!

I will show them how to 'scaffold' their approach to climb to the top. By demonstrating how good they are at the subject - this will set them up for success.

I had support through a tutor to get through my GCSE English - I got 2 C's and never looked back, going on to get a distinction in a 20000 word dissertation for my MEd & completing my NPQH.

There are many times in our lives where we support and guidance to kick us on to next step!

EVERYONE FACES CHALLENGES!

**'Do not worry about your difficulties
in Mathematics.**

I can ensure you mine are still greater'.

ALBERT EINSTEIN

HOW TO BOOST GREATER CONFIDENCE IN JUST 12 WEEKS?

Step 1

Don't panic!!

Students get fixated with the notion that they need to know everything on the vast Higher Tier Syllabus.

Edexcel GCSE Mathematics June 2023		9	8	7	6	5
1H	Paper 1 (Non-Calc)	67	57	48	36	25
2H	Paper 2 (Calc)	68	58	48	37	26
3H	Paper 3 (Calc)	68	58	49	38	27
Total		203	173	145	111	78

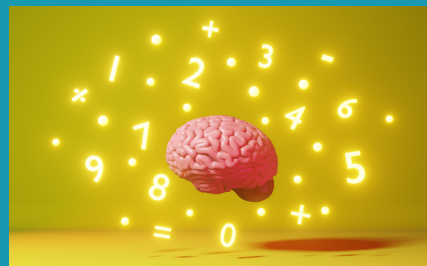

To get a Grade 7+ you need to get approximately 60% of the paper correct.

Therefore, clearly focusing on not dropping marks on this section will be a big stepping stone to getting that 7+ grade.

Step 2

Focus on improving small things

It is important that students numerical & algebraic skills are honed to enable the correct scaffolding to be able to succeed with the demands of the course.

A little tweak here and there can have significant impact on performance.

Step 3

Keep practising those arithmetic skills

From my experience, students who are in Higher Tier classes do not regularly practise their core arithmetic skills. It is just assumed that they are able to do this - therefore, regular focused practice will help build greater fluency and confidence within students. This is great for all ages!

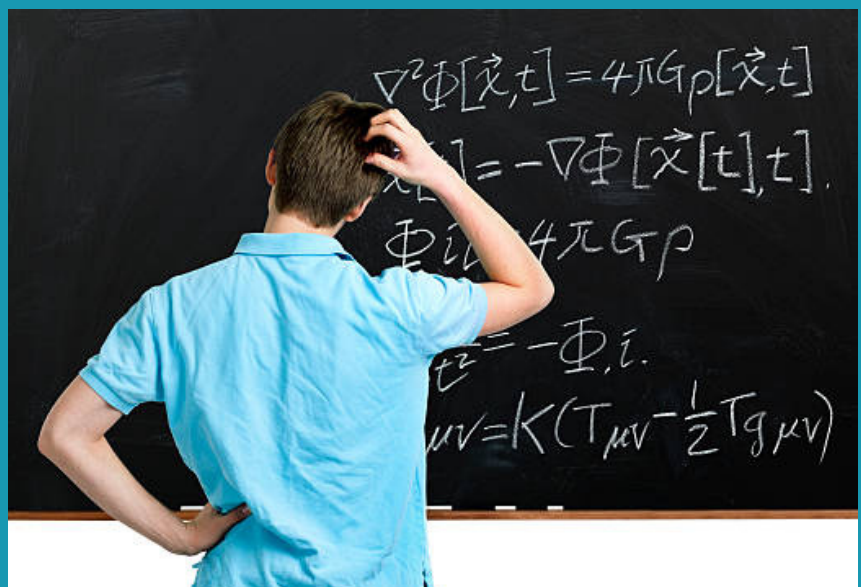

For instance England Rugby Record Scorer Owen Farrell practises over 3 hours a week on the basic skills of kicking a ball!

I hope you find these 3 steps useful!

If you are finding that your child is showing any of the following with the GCSE Mathematics Higher Tier:

- Frustrated
- Feeling inferior
- Shutting down
- Lacking self-belief
- Worried
- Need a boost!

TESTIMONIALS

Jeanette

Mark taught my daughter for maths. She found that he was clear with explanations and supportive. She found her confidence and went onto study maths at 'A' level.

I would highly recommend him.

mrw maths

Andrew

Mark was a mathematics tutor for my son. His expertise and carefully structured support enabled my son to achieve an A* in GCSE Mathematics.

I would recommend Mark unreservedly as an outstanding tutor.

mrw maths

Mark

I was Mark's Headteacher between 2012 and 2018. Mark was and remains an excellent teacher of Mathematics.

He is able to inspire confidence in his students and help them to understand the often-difficult mathematical concepts required. I recommend him without hesitation.
