**Recommended Uses:** This product is intended for dissolution immediately before consumption, and not for creating shelf stable beverages. Maximum recommended solubility is 100 mg/fl oz for liquid formulations. For dissolution in water, dissolve powder into warm water and mix under sterilized conditions. For solid products, mix an appropriate amount until desired potency is reached. Qualify storage temperature and preservatives (if needed) for the liquid and solid products, separately. Although Water-Soluble Powder is stable in its pure, anhydrous form and suitable for use in slurries, pastes, thick liquids, and solid finished products. It should only be mixed with other ingredients under sterilized manufacturing conditions and the finished product tested to ensure homogeneity and shelf life.

**Storage:** Room Temperature, Protect from Light, Protect from Moisture
