

CONTIPLEX[®] ULTRA 360[®]

EXCELLENT VISIBILITY WITHOUT COMPROMISE

The neXt generation of PNB

Continuous peripheral nerve block catheter sets allow pain relief during and after surgical procedures, providing the optimal patient recovery.

Contiplex® Tuohy Ultra 360®

Contiplex® Tuohy Ultra 360® is a continuous technique needle, designed to perform ultrasound guided peripheral nerve blocks in combination with nerve stimulation. The needle is equipped with Tuohy bevel for a safe approach to the nerve. High quality coating enables smooth gliding through tissue.

Contiplex® S Ultra 360®

Contiplex® S Ultra 360® has a 20° facet bevel.

Additional characteristics: Due to high visibility of the X-pattern, both needles are easy to visualize with few artefacts.

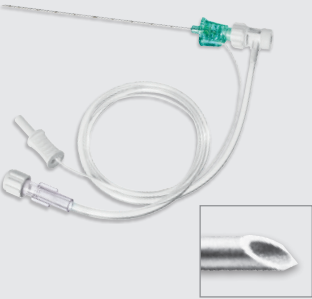

Contiplex® Components

- Insulated Contiplex® needle with integrated wire
- Catheter with threading assist guide
- Homeostasis Valve/Sideport
- Perifix® catheter connector
- Perifix® filter
- Perifix® PinPad
- Omnifix® 5ml syringe
- Catheter label (Nerve blocks)

Safety Code

The B. Braun Ultraline 360 product features the safety code designed to help locate the needle tip in challenging nerve block conditions. The X-pattern is strategically applied on the first 20 mm of the needle shaft to create the three segmented code "short-short-long". This enables distinction between the needle tip and the upper needle shaft.
