

Galal Paper

The Galal family has been producing paperboard since 1950 and is widely recognized as a pioneer of the paperboard industry in Egypt. Galal Paper is the family's most advanced paperboard manufacturing company, specializing in the production of high-quality Core Board Paper with ply bond strength of up to 1,000 joules.

What do we Produce ?

We produce high-quality Core Board used in the production of paper tubes, paper cores, and edge protectors, with an annual production capacity of 60,000 tons.

Today, Galal Paper is recognized as the leading Core Board producer in the Middle East, serving customers across the Americas, Europe, Asia, and Africa. Our products are trusted by leading manufacturers worldwide and are produced in accordance with the highest quality and sustainability standards, including ISO 9001 and FSC certifications.

Why Galal Paper?

1.Consistent High Quality

Our manufacturing process is digitally controlled, and our quality management systems are designed to ensure consistent product performance and superior quality across every production batch.

2.Advanced Quality Control

Every paper roll is tested in our state-of-the-art laboratory, which is equipped with a comprehensive range of paper testing capabilities to ensure compliance with the highest quality standards.

3.Flexibility and Customization

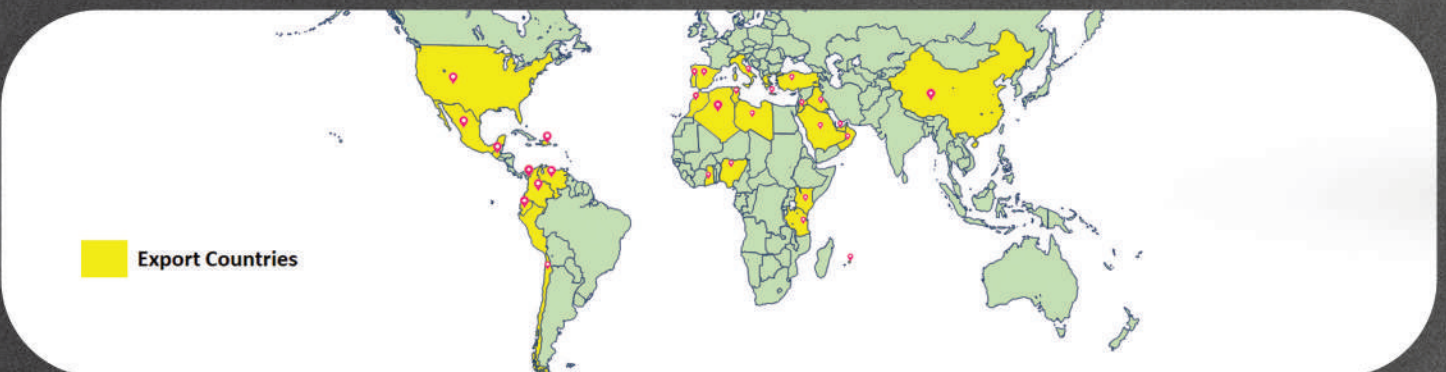

We work closely with our customers to tailor paper specifications and roll dimensions to meet their unique production requirements.

Export Expertise

With extensive experience in international trade, we efficiently manage all aspects of the export process, including logistics, documentation, packaging, and regulatory requirements. Our expertise ensures reliable and seamless delivery to customers worldwide.

Today, we export to the United States, Puerto Rico, Mexico, Colombia, Chile, Guatemala, Ecuador, Spain, Greece, Italy, Turkey, China, Saudi Arabia, Jordan, Oman, the United Arab Emirates, Iraq, Syria, Libya, Tunisia, Morocco, Mauritius, Kenya, Nigeria, Tanzania, and Ghana. As we continue to expand our global presence, our goal is to reach and serve even more customers around the world.

Applications

PAPER TUBES "CORE"

PAPER CONES

PAPER EDGE PROTECTORS

Core Board Production Capabilities

- Basis Weight: 200 - 600 g/m².
- Moisture: 4-8%.
- Roll Width: 75mm to 1950mm.
- Roll Diameter: 800-1250mm.
- Ply bond: Up to 1,000 J/m².
- Bulk: 1.3 - 1.6 cm³/g.
- Burst index: 1.1 to 2.5 kPa. m²/g.
- Cobb 60 ': per request.
