TECHNICAL DATA SHEET

Product Name

β - Nicotinamide Mononucleotide (β -NMN)

Product Specifications

■ Appearance	: White powder
■ Content	: 98.0% ~ 102.0%
■ Purity	: $\geq$ 99.5 %
■ Endotoxin	: <0.5EU/mg
■ Moisture	: $\leq$ 0.5%
■ Residual solvent	: $\leq$ 0.05%
■ pH	: 3.0~4.0

Packaging and storage conditions

- Packaging : Net content 25 kg /barrel
- Storage conditions : Dry, cool, and sun-proof, low temperature storage is better

Product Usage

- As a NAD⁺ precursor, it maintains the body's oxidation-reduction balance and helps delay aging;
- As a NAD⁺ precursor, it increases mitochondrial vitality and improves athletic ability ;
- Repairs skin and anti-oxidation, reduces the formation of melanin, and makes skin shiny and firm.
